What People Are Saying About Buddy Lee

“My goal is to align my brand with the absolute best, creme de la creme, partners out there. When we started having Jump Rope quality issues, only one name came to my mind. Buddy Lee. Not only does he make the absolute best Jump Ropes, but his education is second to none. 9Round is a proud partner with the Buddy Lee brand.”

—Shannon “The Cannon” Hudson, Founder of 9Round

“We have a long-standing relationship with the Buddy Lee brand and training system, featured in our Ropes and Straps videos. Buddy Lee is the King of Jump Rope!”

—Randy Hetrick, Founder of TRX

“Buddy Lee—the Baddest Jumper on the Planet!”

—Yahoo Sports

“In our club, we have always integrated the Buddy Lee Jump Rope Training methods and programs. We are setting national records in speed and power, exclusively using Buddy Lee speed ropes. His freestyle ropes with the swivel bearing system are unmatched for everyday and competition performance, durability and tangle-free jumping. *101 Best Jump Rope Workouts* is a must read for beginners through advanced jump rope enthusiasts who want to take their fitness to the next level.”

—Paul Feciura, President of USA Jump Rope, owner of Youth Sports and Coach of National Champion Jumpers

[ABOUT GREG GLASSMAN](#)

FOREWORD

**By Greg Glassman, CEO,
CrossFit, Inc.**

I'm Greg Glassman, creator and founder of CrossFit, Inc.

Initially adopted by police academies, tactical operations teams, military special operations units, and champion martial artists, millions of athletes of all ages and abilities around the world are now improving their fitness and health by following CrossFit's diet and exercise prescription.

Our fitness prescription is constantly varied, high-intensity, functional movement. Within this variety, we include jumping rope, along with practices such as Olympic weightlifting and gymnastics for its "advantages in developing dynamic balance, speed, quickness, agility, coordination, concentration, and cardiorespiratory efficiency," just as Buddy Lee wrote in the CrossFit Journal back in 2007.

I first met U.S. Olympian Buddy Lee in 2007, when we brought him in to teach jump rope at a CrossFit Level 1 seminar at the U.S. Marine Corps Base in Quantico, Virginia. Since then, I've considered him a colleague and a friend. When Buddy and I met, CrossFit had 500 affiliate gyms. Our affiliates now number over 14,500. Over the past two decades, CrossFit has changed the fitness landscape. And as we have grown, Buddy Lee has remained the authority on jump rope and its uses as an effective training mechanism.

As the jump rope conditioning coach to the U.S. Olympic teams and the U.S. military, Buddy has tested and proven his system with many of the greatest athletes on earth, including our own CrossFit competitors. This year, Buddy Lee returns as CrossFit's Jump Rope Subject Matter Expert,

teaching our workshop participants practical and effective jump rope skills to incorporate into their programming and workouts. I can offer no greater endorsement than to bring Buddy back as a CrossFit SME.

It's a pleasure to witness Buddy doing what he loves, whether demonstrating in person or sharing his years of expertise in this book. His methodology, detailed here, develops the athlete at all stages by increasing jump rope proficiency and capacity.

A decade ago, Buddy described our shared principles of functionality, intensity, and variety as a hope for "taking us back to the basics and setting the standards that can help our nation to regain its health."

Jump rope is a great tool to that end, and Buddy Lee is the best.

GREG GLASSMAN

Founder and Chairman, CrossFit, Inc.

INTRODUCTION

Ask someone where the jump rope came from and you'll likely hear something about how its origins stem from boxing training, or children playing Double Dutch in the schoolyard.

Jump rope actually dates back to the Egyptians and the Aborigines of Australia, where jump rope activity evolved as a form of play using vines and flexible bamboo. From there, it spread to the Western world, where medieval paintings show children jumping rope and rolling hoops down the cobblestone streets of Europe.

For many of us, jumping rope is a somewhat distant memory from our childhood—you might remember having had to perform cloth or segmented (beaded) jump rope exercises during elementary school gym class. But for most of us, after that, the jump rope vanished.

Now, with the explosion of CrossFit in 2018, jump rope has become a staple of just about every CrossFit Box (gym) and WOD (workout of the day), with the integration of advanced techniques like **Double Unders** and **Triple Unders** being common. Yet these two techniques (as well as the traditional “basic bounce”) are the only three techniques that most people are familiar with. While these techniques are useful, they barely scratch the surface of the jump rope's potential.

I have been on a personal health and wellness crusade, teaching jump rope for over 30 years around the world. Along the way, I have assembled a tremendous additional arsenal of jump rope training techniques, which I have systemized to improve physical fitness beyond comprehension. Back in 2007, Greg Glassman, the creator of CrossFit, personally asked me to teach jump rope training to his new CrossFit-based community. Since then, CrossFit has emerged as the greatest fitness movement in history, and its massive growth has helped to influence millions of people throughout the world to get fit, be strong *and* jump rope.

Prior to my development of the **Buddy Lee 3 Step Jump Rope Training System™**, some people thought jump rope was nothing more than a playground activity. It wasn't until I introduced jump rope training to the mainstream that people truly began to recognize the incredible power and impact that the jump rope and proper jump rope training education could have on the world.

Unfortunately, there are those who have not yet discovered my system. What's more, there is currently no unified system in place to teach people with different needs how to master proper jump rope skills using safe progressions. This misuse, caused by a lack of access to accurate education, often leads to injury and less than optimal results. People end up jumping rope incorrectly, lacking an understanding about how it can serve as a gateway to athletic, physical and aesthetic greatness.

There is indeed an art to jumping rope! Not only that, it is very important that you learn this art through a safe, progressive and measurable program, if you expect to harness its incredible power and ultimately gain the greatest health and fitness results possible, while preventing injury.

I have written jump rope books before, where I've presented in-depth knowledge on the science of jump rope training, revealing my many secrets on how to most effectively master its many skill-sets. Those best-selling books contain a detailed education on all of the various techniques involved with proper jump rope training and illustrate the history of the jump rope, including jump rope product technology and choosing your perfect rope. It would be wise to pick up my book *Jump Rope Training, Second Edition* to learn these vital skill-sets, so that you can most benefit from the amazing workouts you're about to discover in this book.

So, why is this book and its workouts something that you should take seriously?

Well, for starters, jumping rope (properly) helps combat the obesity pandemic, as well as other diseases. The Centers for Disease Control and Prevention (CDC) reports 1 billion people in the world as overweight, especially in areas where food supplies are plentiful and lifestyles are sedentary.

In the United States alone, obesity in the adult population is at an all-time high—1 in every 2 adults are overweight, and 1 in every 6 children is overweight according to the National Center for Health Statistics (NCHS). Today, obesity is defined medically as a disease and is directly linked to heart disease. If things continue in this downward spiral of sedentary lifestyles and declining health, we're looking at more than one person dying each and every minute from heart disease-related complications.

My vision with this book is to educate, motivate and encourage the world's population to begin jumping as a way of combatting disease and improving life! I care deeply about people and feel a responsibility to share my knowledge through the power of the jump rope.

The many benefits that come from jumping rope are well-documented by research and endorsed by medical communities across the globe. In fact, China's government has mandated that schools include jump rope training as a part of the education curriculum. They recognize the benefits to both health and mind; China will invest ¥80 billion a year to increase physical fitness among its 1.4 billion population.

The jump rope workouts contained in this book were designed especially for you. There are no gimmicks or quick-fixes; you'll need to put the effort in and eat right, but I assure you that in a relatively short amount of time, you *will* experience amazing health benefits, ones that will dramatically transform your body and mind into a whole new you. It's that real; and now, it's time to gain genuine wealth by taking control of your health.

These time-tested workouts were developed to help extraordinarily improve health, burn fat and increase the physicality of any athlete. It applies the Buddy Lee jump rope training method and skill-sets, making these powerful workouts an integral part of any existing training program and exercise routine.

The **Buddy Lee 3-Step Jump Rope Training System™** is based on the following:

1. **Base Phase:** Learn to master the bio mechanics to become jump rope proficient.

2. **Conditioning Phase:** Learn to increase jump rope capacity and add new skills while maintaining consistency.
3. **Sports Training Phase:** Learn to increase jump rope intensity, using all planes, through my baseline measurement system.

We will cover each step in a little bit, giving you enough of an understanding to literally *jump* right into action. (However, as I mentioned earlier, it will be to your benefit to take some time to truly learn and master my jump rope training skill-sets by visiting learnhowtojump.com and buddyleejumpropes.com.)

“My Jump Rope Training System combines high intensity and various jump rope skills, performed in all planes designed to produce the greatest benefits in the least amount of time.”

—Buddy Lee

This book is straightforward and gives you exactly what the title says—101 of the absolute best jump rope workouts. All you need is motivation, a great jump rope, and the right surface to jump on (discussed in more detail in Chapter 2). After that, you simply need to follow the step-by-step guidelines laid out for each workout. The workouts are organized into specialty categories, so you can quickly determine what each workout offers in regard to its intended training result, the length of the workout, the amount of effort you can expect to put in, and the recommended frequency.

So, if you're ready to take your fitness to a whole new level, becoming lean and strong, I'm more than ready to help you get there. Let's get ready to Jump and forever change your body, health and life!

GETTING STARTED

HOW JUMP ROPE COMPARES TO OTHER EXERCISES

Jump rope is ranked as one of the most efficient exercises for improving cardiovascular health. The American Heart Association promotes it in elementary schools across America to help raise awareness about heart disease and stroke prevention. According to an often-quoted research article by John A. Baker, 10 minutes of jumping rope at a leisurely pace of 120 revolutions per minute (RPM) or 2 revolutions per second (RPS), provides the same cardiovascular benefits as 30 minutes of jogging and burns about 12.9 calories per minute (for a 150-pound person; the more you weigh, the more calories you will burn).

There are other exciting factors that help to make jump rope exercise even more effective. Variations in jump speed, jumping patterns, jump techniques and jump progressions all lead to making jump rope one of the most effective and versatile exercises on the planet!

10 minutes of jump rope can provide the same cardiovascular benefits as...

- 2 sets of tennis singles
- swimming 720 yards in 12 minutes
- 18 holes of golf without a motorized cart
- 45 minutes of skating
- running a mile in 12 minutes
- biking 2 miles
- 20 minutes of handball and/
or racquetball
- 30 minutes of jogging

THE BENEFITS OF JUMP ROPE

Jump rope provides endless benefits, such as balance, coordination, rhythm, timing, improved proprioception, speed, quickness, agility, aerobic and anaerobic conditioning, and better lymphatic drainage, as well as

brain-boosting improvements in learning, reading comprehension and retention skills.

By placing the musculoskeletal system under the consistent “good” stress of jump rope exercise, it helps to increase bone density while preventing diseases like osteoporosis (bone loss and bone density deterioration). Jump rope exercise also helps conquer bad stress and mood disruptors like anxiety and depression. Stress-related symptoms are often a direct result of a stress overload. Jumping rope increases the number of endorphins released in the brain and helps to dramatically enhance mood.

CHOOSING THE RIGHT EQUIPMENT: NOT JUST “ANY” JUMP ROPE

As a U.S. Olympian, I have mastered the processes necessary for achieving peak human physical potential. I have had the opportunity to train people from all walks of life—from beginner to elite athletes—and all have achieved an extraordinary level of success. For many, the results have been life-changing.

I have spent over 30 years researching, designing and testing jump ropes with innovative technology, all to help people jump more efficiently while maximizing their overall training effects. My patented technology includes an external swivel bearing system to help turn the jump rope with an ultra-fast smooth turning motion, in all directions, with no rope tangle or drag. It is responsible for some of the world’s fastest jump rope times, and is the very tool used to induct children and adult jumpers into the Guinness Book of World Records. The most popular jump ropes on the market today are all variations of my technology.

The ropes we recommend in each workout are categorized as Hyperformance™ jump ropes, designed to be aerodynamic and perfectly balanced. This, combined with a smooth, controlled and ultra-fast turning action, will let you make the most of your jump rope workouts.

The recommended jump ropes fall into these categories:

- Beaded Rope: Beaded Versa Trainer™ Rope
- Speed Ropes (PVC): Magic Speed™ Jump Rope, Aero Speed® Jump Rope, Rope Master® Jump Rope
- Super Speed Ropes (Cable): Aero Speed® with Green Hornet Cable®, Super Sonic Speed Rope™, Super 20 TPS Rope™
- Heavy Ropes: Thick Cable or Weighted (1 lb or less)

Or, choose a similar rope that fits your style and skill level.

Different rope materials provide different training effects. A beaded rope is well balanced, easy to control and is great for learning the basics. A Speed Rope is lightweight and designed to generate speeds up to 5 rotations per second (RPS) for faster reflexes and reaction times. This transfers over to increased speed, quickness and agility. A Super Speed Rope provides the same benefits and more. It is usually made with a thin cable which results in even quicker reflexes, turning at speeds of 6 RPS and faster. A Heavy Rope has weights (either in the handles or distributed throughout the cord or cable) which creates a greater centrifugal pull, improves gripping strength and challenges the forearms and shoulders to increase upper body strength.

Measuring Rope for Your Height

To properly measure your jump rope to match your height:

1. Stand on the center of rope with one foot.
2. Extend the tip of the handles to reach from the ground to your:
 - a. shoulder (beginner)
 - b. under arm (intermediate)
 - c. lower chest (advanced)
 - d. lower ribcage (competitive jumper)

The shoulder measurement is a guideline and should provide sufficient clearance for starting out in your jump rope program. Once you become

more proficient at jumping, adjust your rope to a desired shorter length (b through d) for maximum benefits. (For more information, see Buddy Lee's videos and book at learnhowtojump.com).

Footwear

Wear tennis shoes (with inserts, if necessary) that fit the shape of your feet and provide adequate support, especially under the balls of your feet, since jumping activity requires bounding on the balls of your feet (personally, I wear inserts). You can choose whichever brand best suits you.

BAREFOOT JUMPING

Walking barefoot strengthens and stretches the muscles, tendons and ligaments in your feet, ankles and calves. This helps prevent injury, knee strain and back problems, while strengthening and stretching your core to maintain balance and keep your posture upright.

According to a study from Cal State Fullerton, when jumping and landing without shoes or with minimalist shoes, you will generally jump higher and experience less impact forces. The cushioning provided by athletic shoes absorbs some of the force the body is attempting to produce, thereby decreasing the overall amount of power produced.

That said, most of us have become accustomed to wearing traditional shoes with support and stability during exercise. So, unless you regularly participate in a barefoot sport, it is important that you ease into this type of jump rope training, in order to prevent injuries.

Surface

You can jump almost anywhere. Be sure to choose a surface that provides sufficient “give,” especially during the takeoff phase. You'll also want the necessary support during the landing phase of each jump. Wooden and rubberized surfaces are overall the best choices, as they consistently provide equal give and rebound. The surfaces listed below absorb and spread

impact over a longer time and distance, providing for minimum impact and reduced risk of injury.

Recommended Surfaces

Wood and rubber

Gym/aerobics floor

Artificial turf (soccer, football and hockey field)

Track and field arena

Tennis court

Portable rubber mat (lay over concrete, tile, etc.)

Well-manicured lawn

Level dirt

Rebounding Surfaces*

Trampoline

Gymnastics floor

Acro board

If you are rehabilitating from a lower body injury and are at a point of just starting to place weight on the body, jumping rope on a *rebounding surface* is a good way to minimize impact, while helping to build the body back up. It is important to use correct technique and progress gradually.

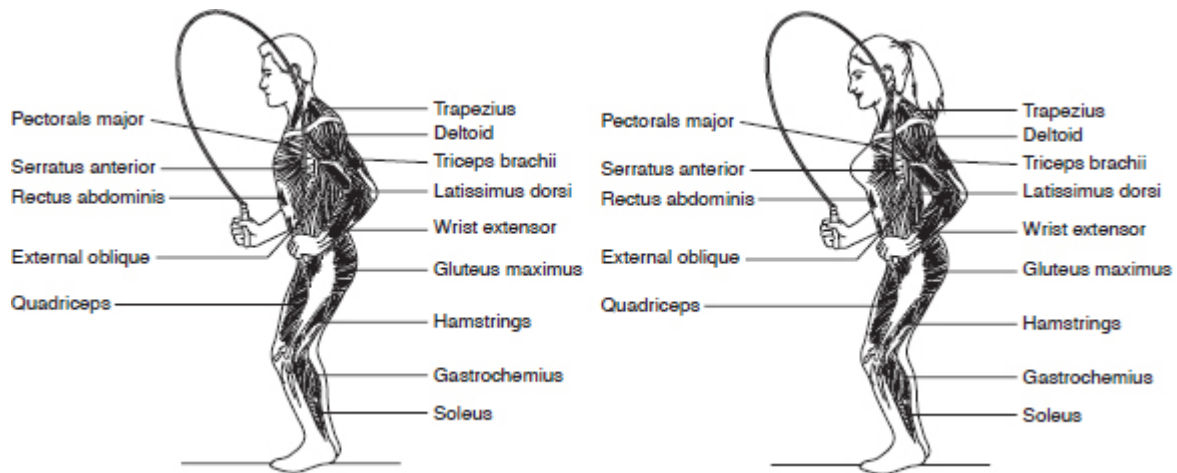

BIOMECHANICS OF JUMPING ROPE

Jump rope is a continuous and repetitive cyclic motion that requires control during the load, flight and landing phase—all while balancing one's body weight evenly on the balls of your feet. Jump rope is a learned skill and requires total body movement and major muscle recruitment. When you jump rope, many muscle groups of the upper and lower body are called into action. During the load, propulsion, airborne and landing phase of the jump, different muscle groups come into action to complete the skill successfully.

As such, jumping involves synchronization and coordination of both a

circular and linear movement. The greatest benefits are derived from the integration of upper and lower body movements in synchronization with the turning of the rope, while moving in all planes at various intensities.

For each successful jump, you are required to master proper timing and coordination of the rope swing, while at the same time gripping the handles to harness the power from the centrifugal tendencies of the rope. These complex actions develop great kinesthetic awareness and fine tune motor-skills. It is in this process of performing high intensity, continuous non-stop jumping in different planes, where the multi-benefits of jump rope are achieved.

Shadow Jumping

Shadow jumping is a simulation of jumping rope—without the rope. It will help prepare you for actual rope jumping, while executing different hand and foot patterns. In addition to the Basic Bounce, you can apply steps 1 and 2 of this tool to all the other jump rope techniques in this book.

Here are the Three Steps to Shadow Jumping:

1. Practice the takeoff and landing of the Basic Bounce without the rope, jumping 0.5 to 1 inch off the ground.
2. Practice the Basic Bounce, while swinging the rope to the side of your body. This will develop the necessary timing for coordinating the rope

swing with each jump.

3. From a starting position, rest the rope behind slightly bent knees. Keep your elbows at a 90-degree angle with your arms held close to your sides. With a small circular wrist movement, practice swinging the rope over your head in a nice even arc. The loop should be wide enough for you to easily jump through. Your hands should stay in the same position throughout the movement.

SAFETY PRECAUTIONS

While jump rope is intended to be a low-impact exercise, it *can* be high-impact when performed incorrectly! Please consult with your primary care physician before starting the jump rope workouts in this book, especially if you are suffering from any kind of health issue or bodily injury which may prevent you from participating in exercise.

Remember, the following workouts are merely guidelines and can be modified to fit your specific wants and needs. In the meanwhile, if you're healthy, there is no excuse not to jump rope.

** A good rebounding surface is also a great tool to help with mastering advanced skills like Double and Triple Unders, because it provides extra flight or "hang time" to execute the skill successfully. This helps to develop muscle memory for mastery of the skill on the recommended surfaces.*

**BUDDY LEE'S
15 JUMP ROPE
TRAINING
TECHNIQUES**

It doesn't matter who you are; my jump rope training has helped athletes, movie stars, singers, dancers, business men/women, politicians, stay-at-home parents and kids around the world.

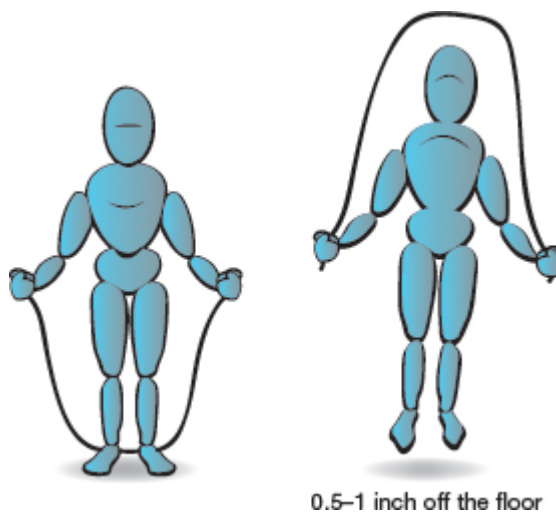

In order to keep this book concise and easy to follow, the fundamentals of how to learn the skill of jumping and proper anatomical body position and posture are featured online at learnhowtojump.com. Please refer to and learn this material before starting the workout programs in this book. On this website, you will learn to master the two basic techniques, as well as 15 additional jump rope techniques that will be utilized in the jump rope workouts in this book.

These 15 techniques challenge the body and mind, increase caloric expenditure and help contribute to development and performance to help you become your absolute best. All techniques can also be performed moving forward, backwards and laterally.

BASIC TECHNIQUES

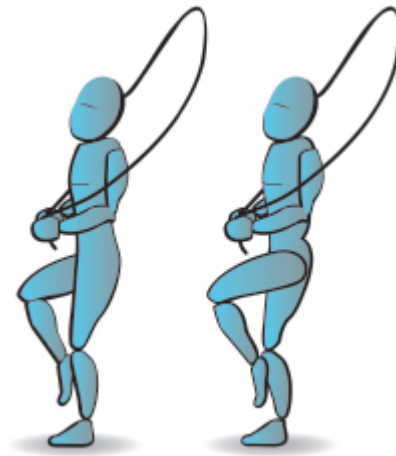

The two basic and most important skills are the Basic Bounce and the Alternate Foot Step. These two techniques create the foundation for learning my system and all jump rope programs in this book.

Basic Bounce

Jump with both feet together. While simple to do, this movement is foundational to every other jump rope technique, so you'll need to make sure you're completely comfortable with it. Remember to keep thumbs on top and handles parallel with the floor.

Alternate Foot Step

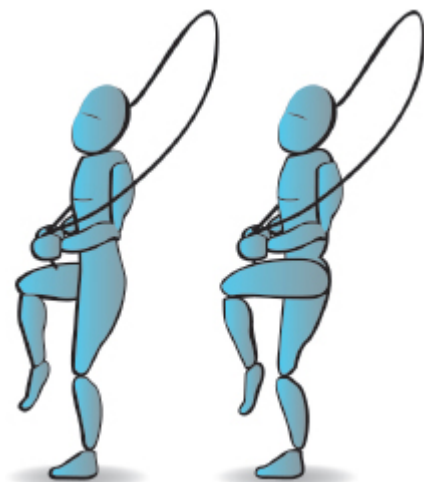

Swing rope around and jump over it with one foot. Now, swing the rope around again and jump over it with the alternate foot. Continue alternating feet (lifting knees slightly as if jogging in place). Do not kick feet back. Landing on the right foot and then on the left foot completes one rep. Count right foot and multiply by two for the total score.

SINGLE ROPE TECHNIQUES

These single rope skills allow you to create endless amounts of variations.

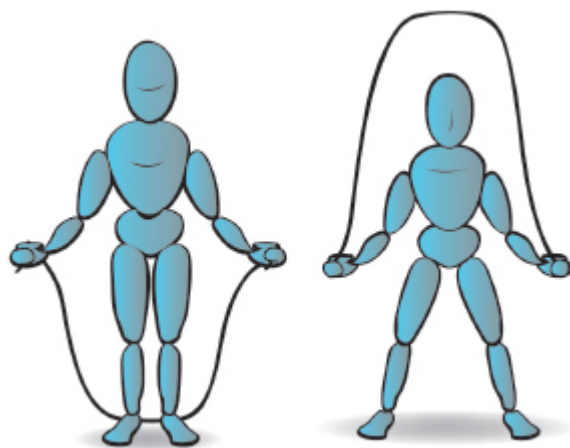

Skill Set 1

High Step

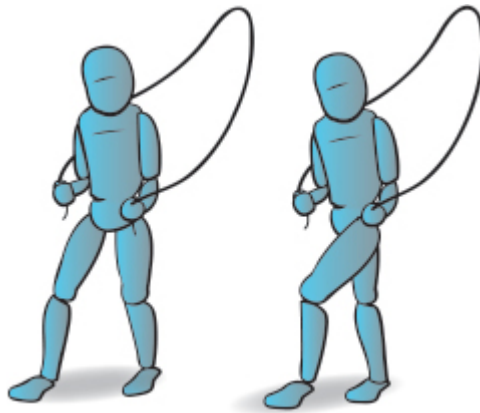

Swing rope around and jump over it with one foot. Now, swing rope around again and jump over it with the alternate foot. Continue alternating feet (lifting knees *to waist height*, as if doing high knees). Do not kick feet back. Landing on the right foot and then on the left foot completes one rep. Count right foot and multiply by two for the total score.

Side Straddle

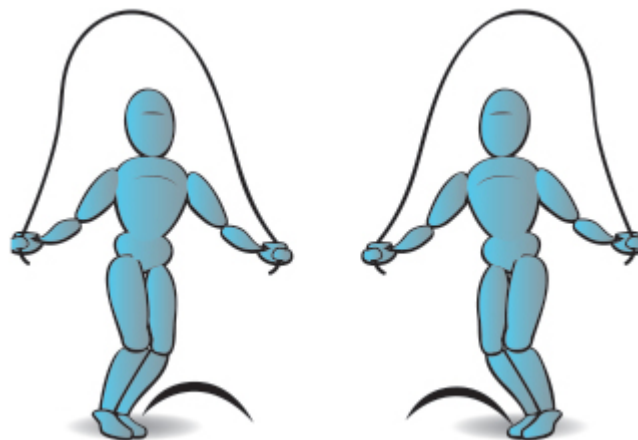

Begin with Basic Bounce, then jump with feet shoulder width apart. Alternate. Landing with feet together and then with feet apart, completes one rep. Count when landing apart and multiply by two for the total score.

Forward Straddle

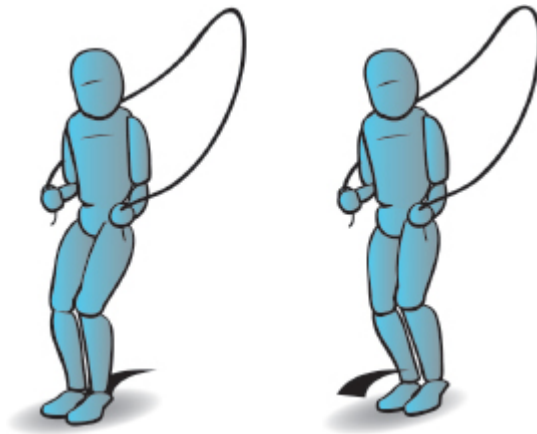

Jump with one foot forward in a straddle position and alternate. Move feet only a few inches. Landing with right foot forward and then with left foot forward, completes one rep. Count when landing with right foot forward and multiply by 2 for the total score.

Skier's Jump

Jump a few inches to the right, then jump a few inches to the left. Alternate. Keep feet together and torso straight ahead. The result should look like a skier's slalom. Landing to the right and then to the left, completes one rep. Count when landing to one side and multiply by two for the total score.

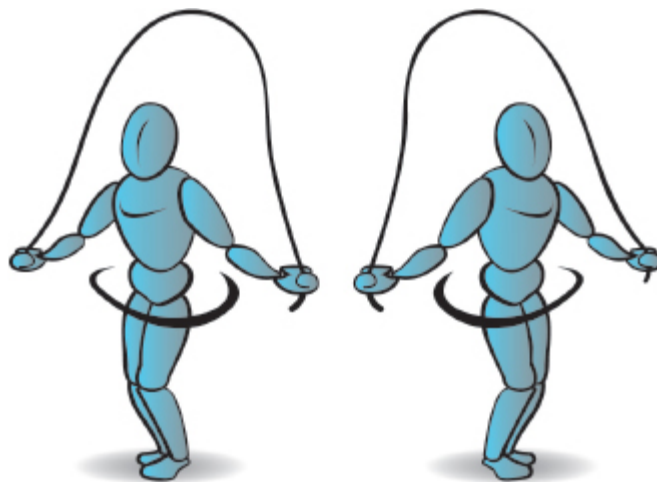

Bell Jump

Jump a few inches forward, then a few inches back (the movement looks like the clapper of a bell). Landing first forward and then backward, completes one rep. Count when landing forward and multiply by two for the total score.

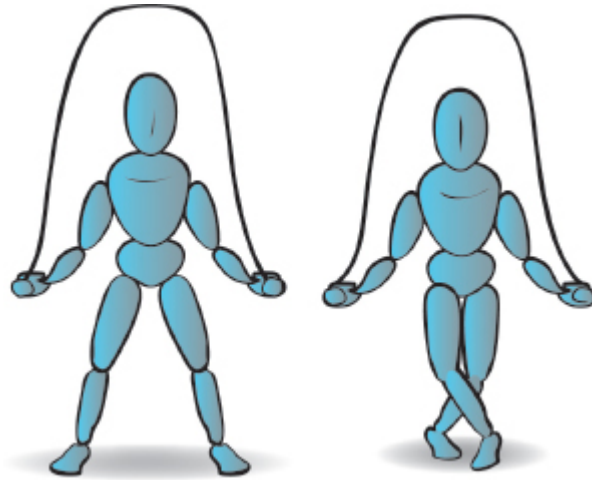

Skill Set 2

Full Twister

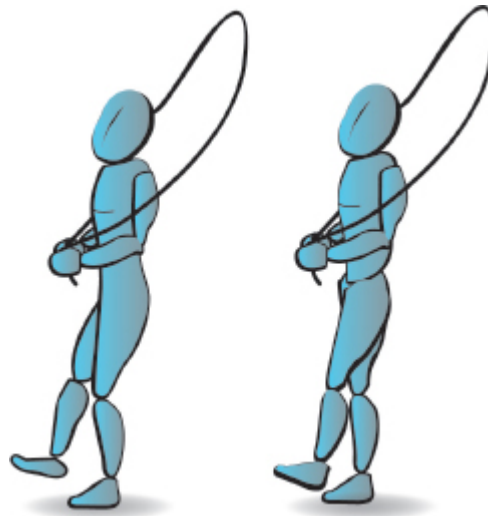

Bounce jump and twist lower body to the right. Jump and twist to the left. Alternate. Landing to the right side and then to the left, completes one rep. Count when landing to the right side and multiply by two for the total score.

X Foot Cross

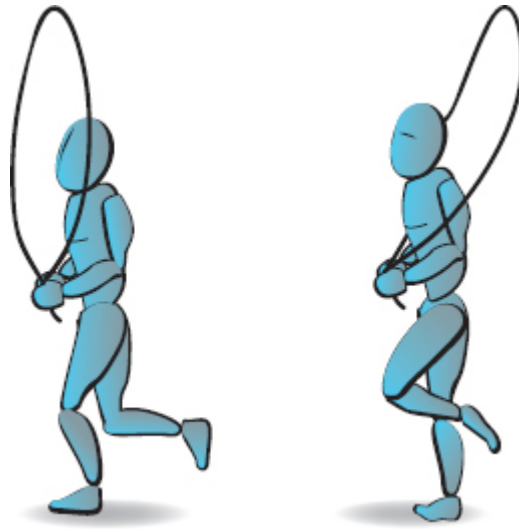

Begin with the Side Straddle. On the second swing, cross one leg over the other. Jump to Side Straddle again. On second swing, cross the opposite leg over the other. Alternate. Landing in a side straddle and then with legs crossed, completes one rep. Count when landing apart and multiply by two for the total score.

Forward Shuffle

Extend one foot forward a few inches with knees straight, alternating feet and keeping the upper body straight. Extending right foot forward and then left foot forward, completes one rep. Count when shuffling right foot forward and multiply by two for the total score.

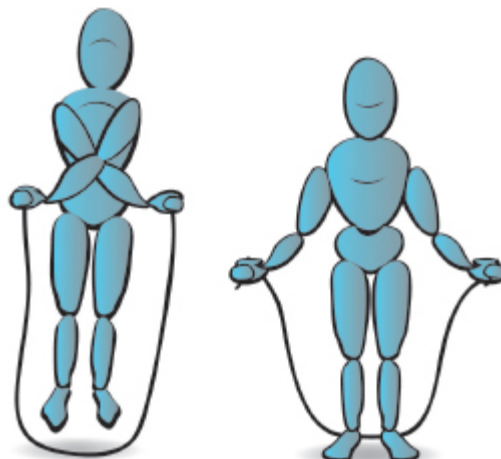

Backward Shuffle

Extend feet back, bending knees at a 90-degree angle, alternating feet. The movement should resemble a low kicking motion. Landing kicking right foot back and then left foot back, completes one rep. Count when shuffling right foot backward and multiply by two for the total score.

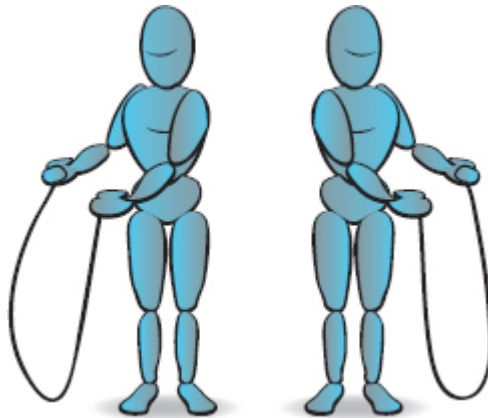

Skill Set 3

Arm Cross Over

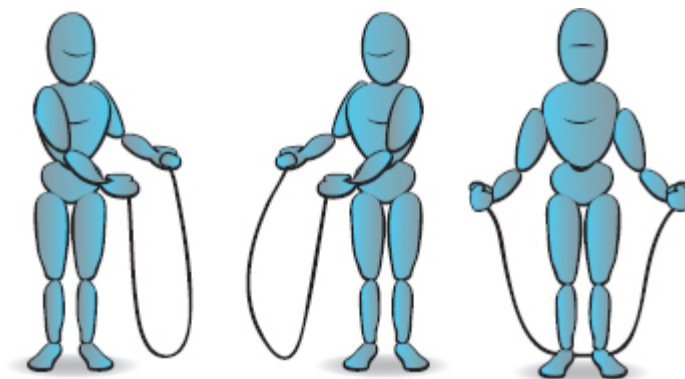

Swing rope around and cross tightly at waist level. Uncross on second jump. Remember to keep thumbs on top and handles parallel with the floor. Alternate on every other jump. Landing with arms crossed and then with arms open, completes one rep. Count when landing and uncrossing, and multiply by two for the total score.

Side Swing

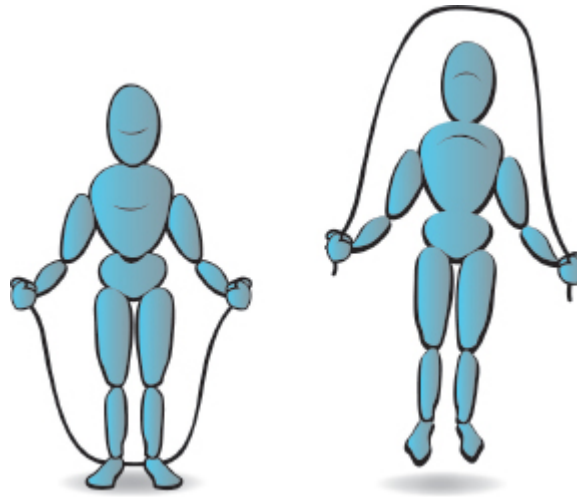

Swing rope to the right with hands together, then swing rope to the left, crossing the right arm over the left arm. Repeat. Practice this technique before attempting the Side Swing to Jump.

Side Swing to Jump

Swing rope to the right with hands together, then swing rope to the left, crossing your right arm over the left arm. Now, open rope by extending right arm to the right and jump through the loop. This complete one rep. Count when jumping over the rope and multiply by three for the total score.

Backwards Jumping

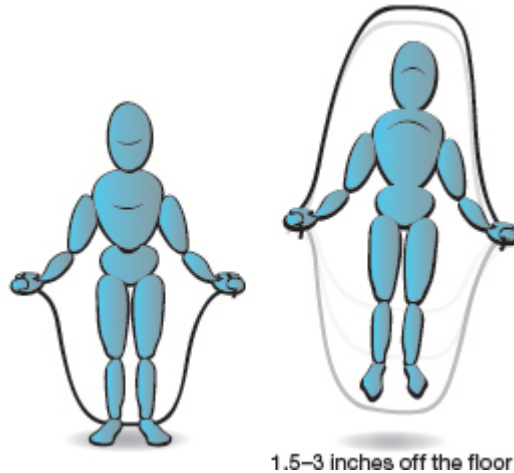

Jump with feet together, like in Basic Bounce, but turning the rope backwards. Keep arms close to sides, and hold chest out.

POWER JUMP TECHNIQUES

Remember to always warm up before doing Power Jumps. Performing a Double or Triple Under without a proper warm-up is like preparing yourself for a torn calf muscle or Achilles tendon.

Double Under

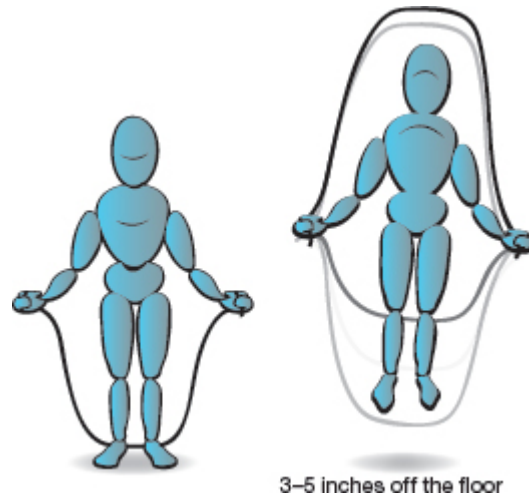

Jump a little higher than Basic Bounce. Turn wrists quickly to allow the rope to turn twice in one jump. Keep head straight, core tight and torso relaxed for good jumping form. Each Double Under, completes one rep. Multiply by two for the total score.

You can also perform Double Under variations, which are Double Unders with different patterns:

- Double Unders (Side Straddle)
- Double Unders (Forward Straddle)
- Double Unders (Skier's Jump)
- Double Unders (Bell Jump)
- Double Unders (Full Twister)
- Double Unders (X Foot Cross)
- Double Unders (Arm Cross Over)
- Double Unders (Backwards Jumping)
- Double Unders (360/moving in a circle)

Triple Under

Do not attempt Triple Unders until you can perform 100 consecutive Double Unders. Starting from Double Unders, jump higher than a Double Under. Turn wrists quickly to allow rope to turn three times in one jump. Keep head straight and torso relaxed for good jumping form. It is a good idea to practice this technique on a rebounding surface for developing kinesthetic awareness and extra “hang time.” Each Triple Under completes one rep. Multiply by three for the total score.

**AN
INTRODUCTION
TO THE
SYSTEM**

JUMP ROPE MASTERY: BUDDY LEE'S 3-STEP JUMP ROPE TRAINING SYSTEM™

*Buddy Lee's motto: "Train with the rope the way you want to move:
jump for speed, power and finesse."*

The first 18 workouts in this book cover the base, conditioning and sports training phases. These are skill-building workouts meant to teach proper biomechanics while gradually increasing your jump rope endurance and intensity. During these important phases, the mind and body will make the critical neural connections and adjustments necessary for remembering correct jump rope form. These include body awareness, and how to control, coordinate, synchronize and time the circular motion of the rope with the linear motion of the body to successfully complete key skills.

The primary goal of these workouts is to develop muscle memory for Jump Rope Mastery through repeated practice of jump rope techniques, until performing them correctly becomes an automatic response. **This is where Jump Rope Mastery takes place.**

Base Phase

The base phase workouts lay the foundation for more advanced, higher-intensity jump rope workouts. It teaches you the biomechanics of how to master the Perfect Jump using the two basic techniques: the Basic Bounce and the Alternate Foot Step. During this phase, you'll be working towards 140 consecutive jumps for proficiency and 500 consecutive jumps for building a basic jump rope capacity. Focus on technique, consistency and continuity, not on speed.

Conditioning Phase

In the conditioning phase workouts, you'll build up to 5 minutes and 10 minutes of non-stop jumping, while adding single rope and power jump

techniques in three skill sets. The focus is now on jumping at 160–180 RPM (2.7–3 RPS).

Sports Training Phase

In the sports training phase workouts, rope speed is increased to 222–240+ RPM (3.7–4+ RPS), while using every jump rope technique. You'll also establish your jump rope baseline (the maximum number of jumps performed in a set amount of time). You will use your baseline score as a performance goal during the high intensity workout programs in this book.

You will then move on to the high-intensity workouts, which will lead to dramatic improvements in your athletic performance, including a hyper-boost to your speed, quickness and agility. If you have any questions, please visit my website (learnhowtojump.com) which is designed specifically for my *101 Best Jump Rope Workouts* readers and future LearnHowToJump community.

BUDDY LEE ROPE SPEED AND RANKING SYSTEM™

Technique: Alternate Foot Step

Intensity	Level	Purpose	Speed RPS	Reps 30 Seconds	Reps 60 Seconds
Very slow	Grasshopper	Recreational	<1.9	<57	<114
Slow	Novice		2.0–2.4	60–72	120–144
Medium	Junior	Fitness Enthusiasts	2.5–3.4	75–102	150–204
Fast	Junior Elite		3.5–4.5	105–135	210–270
Very fast	Senior	Ultra-Fitness	4.6–4.9	138–147	276–294
Super-fast	Senior Elite	World Class Athletes	5.0–5.5	150–165	300–330
World Class	Rope Ninja	Competitive Jumpers	5.6–6.2	168–186	336–372

World RecordHolder	Grand Rope Master		7.0+	210+	420+

10 DO'S AND DON'TS OF JUMPING

Do's

1. Jump only high enough to clear the rope (less than 1 inch off the surface).
2. Keep body upright with chest out, while relaxing upper body.
3. Focus eyes straight ahead to maintain good balance.
4. Breathe and exhale during each jump rope session.
5. Position thumbs on top of handle grip and relax your grip.
6. Extend arm position to waist level at 45-degree angle.
7. Make small circular movements with the wrists; the size of a quarter.
8. Push through the surface and land lightly and evenly on the balls of your feet, while keeping core stable and engaged.
9. Build your jump rope proficiency and endurance gradually.
10. Be sure to stretch upper and lower body before and after each jumping session.

Don'ts

1. Do **NOT** jump too high and land hard when learning to jump.
2. Do **NOT** land flat-footed.
3. Do **NOT** slump over during jumping.
4. Do **NOT** extend arms beyond 45-degree angle during jumping.
5. Do **NOT** make big arm circles while turning the rope.
6. Do **NOT** squeeze handles tight during jumping.
7. Do **NOT** hold your breath while jumping.
8. Do **NOT** jump on concrete, tile or other hard surfaces that do not provide any give, which will increase risk of lower body injury.
9. Do **NOT** overdo it by jumping too much too soon.

10. Do **NOT** forget about stretching after each jumping session.

ROPENOLOGY™ AND JUMP ROPE WORKOUT DEFINITIONS

In the workouts, you will find a number of commonly used terms, intended to help you better understand the elements of the workout, your target goals, and the overall intensity of the movements.

Goal: Your game plan for the jump rope workout.

Focus: A key point to concentrate on during the jump rope workout.

Volume : The expected number of jumps performed during the jump rope workout.

Workout : Your jump rope fitness prescription for today.

Tip: A suggestion to follow during the jump rope workout.

RPS (revolutions per second): Total number of jumps performed in 1 second.

RPM (revolutions per minute): Total number of jumps performed in 1 minute.

Intensity: Level of exertion in a jump rope workout, measured by RPS or RPM.

Duration : Length of time of jump rope workout to improve physical fitness and athletic performance.

Frequency : How often to perform a certain jump rope workout to achieve training effect.

Baseline Score (BLS): Maximum number of jumps performed in a certain time period (10, 15, 20, 30, 45, 60 seconds).

JUMP ROPE CHECKLIST

- Inspect rope cord and connections for weak parts and replace.
- Choose a space that provides sufficient clearance (8–12 inches) for the rope to pass overhead, in front of body and on both sides.
- Inspect floor to remove debris like paper clips, coins, etc. that could act as a flywheel and hit an innocent bystander.
- Watch for people who might pass by during your jumping session from the front, rear and side of you.
- Warm up properly before your jump session, including stretching exercises.
- Be sure to stretch (the calves, especially) after each jumping session, to reduce tight muscles.
- Lay rope loosely in bag or hang on a hook (to avoid kinks, do not wrap around handles).
- Store rope at room temperature (to prevent PVC from getting stiff and breaking, do not store in a cold place or garage during the winter).

SKILL BUILDING WORKOUTS

Base Phase Programs

BASE PHASE JUMP ROPE WORKOUT FOR SKILL DEVELOPMENT

1 Perfect Jump

GOAL: Master one perfect jump with the Basic Bounce and Alternate Foot Step. During this session you will develop correct body posture, body awareness, hand position, take-off and landing, and how to relax your upper and lower body with proper breathing techniques.

FOCUS: Begin each jump with rope resting behind the knees. Coordinate the timing of the rope swing with each jump, jumping only high enough to clear the rope. Focus on an object at eye level. Keep your body upright, chest out and core tight, landing softly on the balls of your feet. Grasp the rope with a comfortable grip, and make small circular movements (the size of a quarter).

Jump

Techniques

Basic Bounce
Alternate Foot
Step

Active Rest

2 minutes stretch calves and upper and lower
body.

Equipment

Beaded Versa Trainer™
Rope
Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 25 slow and controlled bounds without rope with correct load, takeoff and landing, alternating between Basic Bounce and Alternate Foot Step.

Intensity ► One perfect jump at your pace

Duration ► Approx. 21 minutes

Frequency ► Repeat this program 1–2 days or until mastery

Volume ► Approx. 100 jumps

ROUND 1

Repeat this round 5 times for a total of 50 reps.

Basic Bounce (10 sets of 1 rep): Practice 1 perfect rep, stop, rest 5 seconds and reset.

Rest 30 seconds

Active Rest (perform after completing Round 1)

ROUND 2

Repeat this round 5 times for a total of 25 reps.

Alternate Foot Step (5 sets of 1 rep): Practice 1 perfect rep. On the first turn, land on the left foot. Stop. Rest rope behind knees, swing it around, and on the second turn, land on the right foot. This equals 1 rep and 1 set. Stop, rest 5 seconds and reset.

Rest 30 seconds

Active Rest (perform after completing Round 2)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: During the Active Rest time, breathe and visualize having good jump rope form, with a relaxed upper body, arms close to sides, and exhale slowly. Be light on your feet and jump only high enough to clear the rope. See learnhowtojump.com for more guidance.

BASE PHASE JUMP ROPE WORKOUT FOR SKILL DEVELOPMENT

2, 3, 4 and 5 Perfect Jumps

GOAL: Master 2, 3, 4, and 5 perfect jumps, with the Basic Bounce and Alternate Foot Step. During this phase you will learn to breathe properly, before and after each jump. Follow the rhythm of the jump; stop, rest, reset and start again.

FOCUS: Begin each set with rope resting behind the knees. Coordinate the timing of the rope swing with each jump, jumping only high enough to clear the rope. Focus on an object at eye level. Keep your body upright, chest out and core tight, landing softly on the balls of your feet. Grasp the rope with a comfortable grip and make small circular movements (the size of a quarter).

Jump

Techniques

Basic Bounce
Alternate Foot
Step

Active Rest

2 minutes stretch calves and upper and lower
body.

Equipment

Beaded Versa Trainer™
Rope
Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 25 slow and controlled bounds without rope with correct load, takeoff and landing.

Intensity ► 2, 3, 4, 5 perfect jumps at your pace

Duration ► Approx. 16 minutes

Frequency ► Repeat this program 1–2 days or until mastery

Volume ► Approx. 210 jumps

ROUND 1

Basic Bounce (5 sets): Practice 2 Perfect Reps non-stop. Stop, rest 5 seconds and reset.

Rest 30 seconds

Basic Bounce (5 sets): Practice 3 Perfect Reps non-stop. Stop, rest 5 seconds and reset.

Rest 30 seconds

Basic Bounce (5 sets): Practice 4 Perfect Reps non-stop. Stop, rest 5 seconds and reset.

Rest 30 seconds

Basic Bounce (5 sets): Practice 5 Perfect Reps non-stop. Stop, rest 5 seconds and reset.

Active Rest

ROUND 2

Alternate Foot Step (5 sets): Practice 2 Perfect Reps. Count the right foot twice and multiply by 2. Stop, rest 5 seconds and reset.

Rest 30 seconds

Alternate Foot Step (5 sets): Practice 3 Perfect Reps. Count the right foot three times and multiply by 2. Stop, rest 5 seconds and reset.

Rest 30 seconds

Alternate Foot Step (5 sets): Practice 4 Perfect Reps. Count the right foot four times and multiply by 2. Stop, rest 5 seconds and reset.

Rest 30 seconds

Alternate Foot Step (5 sets): Practice 5 Perfect Reps. Count the right foot five times and multiply by 2. Stop, rest 5 seconds and reset.

Active Rest

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: During the Active Rest time, breathe and visualize having good jump rope form. Relax the upper body, keep arms close to sides, and exhale

slowly. Concentrate on being light on your feet and jump only high enough to clear the rope.

BASE PHASE JUMP ROPE WORKOUT FOR SKILL DEVELOPMENT

50 Jumps

GOAL: Build up to 15, 25 and 50 jumps non-stop for the Basic Bounce and Alternate Foot Step, while working on improving your technique.

FOCUS: Duplicate the perfect jump 50 consecutive times, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step

Active Rest

Jog in place for 30 seconds to lower heart rate.

Equipment

Beaded Versa Trainer™ Rope
Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 25 slow and controlled bounds without rope with correct load, takeoff and landing.

Intensity ► 50 jumps non-stop

Duration ► Approx. 12 minutes

Frequency ► Repeat this program two times per week until mastery

Volume ► Approx. 356 jumps

ROUND 1

Basic Bounce (2 sets): Jump 15 reps

Alternate Foot Step (2 sets): Jump 7 reps.

Active Rest

ROUND 2

Basic Bounce (2 sets): Jump 25 reps

Alternate Foot Step (2 sets): Jump 12 reps.

Active Rest

ROUND 3

Basic Bounce (2 sets): Jump 50 reps

Alternate Foot Step (2 sets): Jump 25 reps.

Active Rest: Work in variations of calisthenics to include 20 **Classic Push-Ups**, 25 **Bicycle Crunches**, 20 **Dips**, and 20 **Mixed Grip Pull Ups**.

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each set.

BASE PHASE JUMP ROPE WORKOUT FOR PROFICIENCY

140 Jumps

GOAL: Become Jump Rope Proficient with the Basic Bounce and Alternate Foot Step at 140 jumps non-stop and begin to build the most stable, versatile and safest jump rope foundation on the planet!

FOCUS: Duplicate the perfect jump 140 times non-stop, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques Basic Bounce Alternate Foot Step	Active Rest Jog in place for 60 seconds to lower heart rate, then combine with variations of calisthenics.	Equipment Beaded Versa Trainer™ Rope Magic Speed™ Jump Rope
---	--	--

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope, with correct load, takeoff and landing.

Intensity ► 140 jumps non-stop
Duration ► Approx. 14 minutes
Frequency ► Repeat 3 times a week until mastery
Volume ► 930 jumps

ROUND 1

Perform 70 Reps **Basic Bounce**

Perform 70 Reps **Alternate Foot Step**

Active Rest

ROUND 2

Perform 100 Reps **Basic Bounce**

Perform 100 Reps **Alternate Foot Step**

Active Rest

ROUND 3

Perform 140 Reps **Basic Bounce**

Perform 140 Reps **Alternate Foot Step**

Active Rest

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each set.

BASE PHASE JUMP ROPE WORKOUT FOR PROFICIENCY

400 Jumps

GOAL: Increase your jump rope proficiency to 400 jumps non-stop while continuing to build your jump rope foundation.

FOCUS: Duplicate the perfect jump 400 consecutive times, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step

Active Rest

30 seconds jog in place

Equipment

Beaded Versa Trainer™ Rope
Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 400 jumps non-stop

Duration ► Approx. 9 minutes

Frequency ► 3 times a week until you become proficient

Volume ► 900 jumps

ROUND 1

200 jumps: 100 reps **Basic Bounce** and 50 reps **Alternate Foot Step**, non-stop
Active Rest

ROUND 2

300 jumps: 150 reps **Basic Bounce** and 75 reps **Alternate Foot Step**, non-stop
Active Rest

ROUND 3

400 jumps: 200 reps **Basic Bounce** and 100 reps **Alternate Foot Step**, non-stop
Active Rest

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each set. For Alternate Foot Step, count right foot and multiply by two for the total number of jumps.

BASE PHASE JUMP ROPE WORKOUT FOR BASIC CAPACITY

500 Jumps

GOAL: Duplicate the perfect jump 500 times non-stop with the Basic Bounce and the Alternate Foot Step to establish a Basic Jump Rope Capacity, before entering into the Conditioning Phase.

FOCUS: Jump only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step

Active Rest

2 minutes jog in place, stretch

Equipment

Beaded Versa Trainer™ Rope
Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 500 jumps non-stop

Duration ► Approx. 12 minutes

Frequency ► Repeat 3 times a week until mastery

Volume ► Approx. 1000 jumps

ROUND 1

Perform 500 Reps **Basic Bounce** non-stop

Active Rest

ROUND 2

Perform 250 Reps **Alternate Foot Step** non-stop

Active Rest

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each set. For Alternate Foot Step, count right foot and multiply by two for the total number of jumps.

Conditioning Phase Programs

CONDITIONING PHASE JUMP ROPE WORKOUT

Adding Skill Set 1 and Endurance (5 Minutes Jumping)

GOAL: Adding Skill Set 1 (High Step, Side Straddle, Forward Straddle, Skier's Jump and Bell Jump) while becoming jump rope proficient at 5 minutes of continuous jumping and building a jump rope foundation at 160–180 RPM.

FOCUS: Duplicate the perfect jump for 5 minutes of continuous jumping, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step
Side Straddle
Forward Straddle
Skier's Jump
Bell Jump

Equipment

Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 5 minutes continuous jumping at 160–180 RPM

Duration ► Approx. 5 minutes

Frequency ► 3 times a week until mastery

Volume ► Approx. 800–900 jumps

ROUND 1

- 1 minute **Basic Bounce**, **Alternate Foot Step** and **High Step** (8 reps of each, alternating)
- 1 minute **Side Straddle** and **Forward Straddle** (8 reps of each, alternating)
- 1 minute **Skier's Jump** and **Bell Jump** (8 reps of each, alternating)
- 2 minutes **Basic Bounce**, **Alternate Foot Step**, **High Step**, **Side Straddle**, **Forward Straddle**, **Skier's Jump** and **Bell Jump** (8 reps of each, alternating)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: See learnhowtojump.com for more guidance on learning Jump Rope Skill Set 1.

CONDITIONING PHASE JUMP ROPE WORKOUT

Adding Skill Set 2 and Endurance (7.5 Minutes Jumping)

GOAL: Adding Skill Set 2 (Full Twister, X-Foot Cross, Forward Shuffle and Backward Shuffle) while becoming jump rope proficient at 7.5 minutes of continuous jumping and building a jump rope foundation at 160–180 RPM.

FOCUS: Duplicate the perfect jump for 7.5 minutes of continuous jumping, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step
Full Twister
X-Foot Cross
Forward Shuffle
Backward Shuffle

Equipment

Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 7.5 minutes continuous jumping at 160–180 RPM

Duration ► Approx. 7.5 minutes

Frequency ► 3 times a week until mastery

Volume ► Approx. 1,200–1,350 jumps

ROUND 1

1 minute **Basic Bounce, Alternate Foot Step, High Step** (8 reps of each, alternating)

- 1 minute **Full Twister, X-Foot Cross** (8 reps of each, alternating)
- 1 minute **Forward Shuffle, Backward Shuffle** (8 reps of each, alternating)
- 2 minutes **Basic Bounce, Alternate Foot Step, Full Twister, X-Foot Cross, Forward Shuffle, Backward Shuffle** (8 reps of each, alternating)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: See learnhowtojump.com for more guidance on learning Jump Rope Skill Set 2.

CONDITIONING PHASE JUMP ROPE WORKOUT

Adding Skill Set 3 and Endurance (10 Minutes Jumping)

GOAL: Adding Skill Set 3 (Arm Cross Over, Side Swing to Jump and Backwards Jumping) while becoming jump rope proficient at 10 minutes of continuous jumping and building a jump rope foundation at 160–180 RPM.

FOCUS: Duplicate the perfect jump for 10 minutes of continuous jumping, jumping only high enough to clear the rope while maintaining good posture and making brief contact with the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step
Arm Cross Over
Side Swing to Jump
Backwards Jumping

Equipment

Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 10 minutes continuous jumping at 160–180 RPM

Duration ► Approx. 10 minutes

Frequency ► 3 times a week until mastery

Volume ► Approx. 1,600–1,800 jumps

ROUND 1

1 minute **Alternate Foot Step**

- 2 minutes **Basic Bounce** and **Alternate Foot Step** (8 reps of each, alternating)
- 2 minutes **Basic Bounce**, **Alternate Foot Step** and **Arm Cross Over** (8 reps of each, alternating)
- 1 minute **Backwards Jumping**
- 2 minutes **Alternate Foot Step** and **Side Swing to Jump** (8 reps of each, alternating)
- 2 minutes **Basic Bounce** and **Alternate Foot Step** (8 reps of each, alternating)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: See learnhowtojump.com for more guidance on learning Jump Rope Skill Set 3.

CONDITIONING PHASE JUMP ROPE WORKOUT

Learning Power Jumps (Double Unders)

GOAL: Learn the Power Jump techniques (Double and Triple Unders). When you can do one Double Under, practice two in a row, then three in a row and so forth up to five, before attempting to do them continuously. When you can do 100 consecutive Double Unders, practice Triple Unders, by starting from Double Unders using this same program.

FOCUS: Practice complete, precise movements without a jump rope before incorporating the jump rope in the third and fourth round.

Jump Techniques

Basic Bounce
Double Unders

Active Rest

Stretch calves

Equipment

Aero Speed® Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 2 RPS

Duration ► Approx. 10 minutes

Frequency ► 3 times a week until mastery

Volume ► Approx. 20 Double Unders

ROUND 1 + 2 (WITHOUT JUMP ROPE)

Perform 10 reps: **Bounce Step, Bounce Step**, then explode straight up like a rocket (jumping 1.5-3 inches off the floor)

Active Rest

ROUND 3 + 4 (WITH JUMP ROPE)

Perform 10 reps: **Bounce Step, Bounce Step**, then explode straight up like a rocket (jumping 1.5-3 inches off the floor) turning wrists a little faster to allow rope to pass under the feet twice.

Active Rest

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Double Unders can also be practiced on a rebounding surface for developing kinesthetic awareness and extra “hang” time.

Sports Training Phase Programs

SPORTS TRAINING PHASE JUMP ROPE WORKOUT

Increasing Intensity Using All Skills (10 Minutes Jumping)

GOAL: Incorporating all skills to include Double Unders and pumping up the intensity for serious fitness and athletic benefits. You will vary the intensity throughout the program.

FOCUS: Focus on smooth transitions between the different skills, while keeping up with the intensity.

Jump Techniques

All skills (except Triple Unders)

Equipment

Magic Speed™ Jump Rope

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 10 minutes continuous jumping at 3–4+ RPS, varying the intensity

Duration ► Approx. 10 minutes

Frequency ► 2 times a week until mastery

Volume ► Approx. 1,900 jumps, plus 60 Double Unders

ROUND 1

60 seconds **Alternate Foot Step**

15 seconds **Double Unders**

90 seconds alternating between **Basic Bounce** and **Alternate Foot Step** (4 of each)

120 seconds, alternating between **High Step**, **Side Straddle**, **Forward Straddle**, **Skier's Jump** and **Bell Jump** (4 of each)

15 seconds **Double Unders**

60 seconds **Backwards Jumping**

120 seconds, alternating between **Full Twister**, **X-Foot Cross**, **Forward Shuffle**, **Backward Shuffle**, **Arm Cross Over**, **Side Swing to Jump** (4 of each)

15 seconds **Double Unders**

90 seconds alternating between **Basic Bounce** and **Alternate Foot Step** (4 of each)

15 seconds **Double Unders**

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: See learnhowtojump.com for more guidance on learning critical jump rope skills.

ESTABLISHING BASELINE FOR HIGH INTENSITY WORKOUTS

Basic Bounce

GOAL: The goal is to establish your max effort (your baseline), to be used in high intensity jump rope workouts. The chart shows 60 seconds, but can also be used for 10, 15, 20, 30, or 45 seconds.

FOCUS: Jump at max speed, resting 2 minutes between sets.

Jump Techniques

60 SECONDS		$_ \div 3 = _$	$= _$	$_ \div 60 = _$
60 SECONDS		TOTAL BLS	RPM	RPM RPS
60 SECONDS				

Baseline score: *The average number of jumps you get when adding all sets and dividing by the same number of sets.*

RPS: *Revolutions Per Second (total number of jumps performed in 1 second)*

RPM: *Revolutions Per Minute (total number of jumps performed in 1 minute)*

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each set.

ESTABLISHING BASELINE FOR HIGH INTENSITY WORKOUTS

Double Unders

GOAL: The goal is to establish your max effort (your baseline) to be used in high intensity jump rope workouts. The chart shows 60 seconds, but can be used for 10, 15, 20, 30, or 45 seconds. Count Double Under jumps as one repetition after each landing. Multiply by two for the total score.

FOCUS: Jump at max speed, resting for 2 minutes between sets.

Jump Techniques
Double Unders

Equipment
Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Prepare the body to Shadow Jump. Perform 50 slow and controlled Basic Bounce and Alternate Foot Step bounds without rope with correct load, takeoff and landing.

Intensity ► 2–4 RPS

Duration ► Approx. 7 minutes

Frequency ► 2 times a week until mastery

Volume ► Approx. 270–540 Double Unders

ROUND 1 + 2 + 3

Double Unders - 60 seconds (record score)

Rest: 2 minutes

Time	Revs	Baseline Score (BLS) Add revs & divide by 3	RPM	RPS Divide RPM by 60
60 SECONDS		$_ \div 3 = _$	$= _$	$_ \div 60 = _$
60 SECONDS		TOTAL BLS	RPM	RPM RPS

60 SECONDS				
------------	--	--	--	--

Baseline score: *The average number of jumps you get when adding all sets and dividing by the same number of sets.*

RPS: *Revolutions Per Second (total number of jumps performed in 1 second)*

RPM: *Revolutions Per Minute (total number of jumps performed in 1 minute)*

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Jump only 1.5–3 inches from surface. Exhale before the start of each Double Under, relaxing the upper and lower body.

Baseline HIT

HIT JUMP ROPE WORKOUT 1

60 Second Baseline

GOAL: Before starting these workouts, master the Base, Conditioning and Sports Training Phases in this book and establish your 60 second Baseline Scores (see Sports Training Phase programs). To get the maximum results from this workout, strive to maintain or exceed your baseline score.

FOCUS: Perform each exercise with all-out effort for 60 seconds, followed by 60 seconds rest. Repeat each exercise for 3 sets, before moving on to the next round.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step
Arm Cross Over
Side Swing to Jump

Equipment

Aero Speed® Jump Rope

WARM-UP: Perform 250 jumps, alternating between the Basic Bounce and the Alternate Foot Step.

Intensity ► 3–5 RPS

Duration ► 18 minutes

Frequency ► 2 times a week until you can pass your baseline score in all sets

ROUND 1

Repeat 3 times

High Step

Jump 60 seconds

Rest 60 seconds

ROUND 2

Repeat 3 times

Arm Cross Over

Jump 60 seconds

Rest 60 seconds

ROUND 3

Repeat 3 times

CrossFitters

BL JUMP ROPE WORKOUT FOR CROSSFITTERS 1

GOAL: To perform jump rope with various functional exercises for a high intensity kick-ass workout for CrossFitters.

FOCUS: Focus on good form. The key to successful Double Unders is in the quick turning of the wrists. Jump only 1.5–3 inches from the surface.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step
Side Swing to Jump
Double Unders

Other Activities

Kettlebells (Farmers Carry)
Clean and Jerk
Wall Ball

Equipment

Super Sonic Speed Rope™
Super 20 TPS Rope™
Wall Ball
Weight Lifting Bar
Kettlebells

WARM-UP: Perform 500 jumps (500 reps Basic Bounce or 250 reps Alternate Foot Step); 250 jumps forward, 250 jumps backwards. Then, perform 3 minutes shoulder rotation forward and backwards, shrugs, leg and calf stretches.

Intensity ► 2–4 RPS for Double Unders, 3–5 RPS for other jump rope skills

Duration ► Approx. 14 minutes

Frequency ► 2 times per week

ROUND 1

Kettlebell (Farmers Carry) - 100 yards

Side Swing to Jump - 75

Wall Ball Shots - 50

Clean and Jerks - 25

Wall Ball Shots - 50

Double Unders - 75 OR High Step (moving forward) - 150

Kettlebell (Farmers Carry) - 100 yards

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Select all weights based on your ability. When jumping, be sure to land lightly on the balls of your feet.

BL JUMP ROPE WORKOUT FOR CROSSFITERS 2

GOAL: To perform jump rope with various functional exercises for a high intensity kick-ass CrossFit workout.

FOCUS: Focus on good form. The key to successful Double Unders is in the quick turning of the wrists. Jump only 1.5–3 inches from surface.

Jump Techniques

All skills (except Triple Unders)

Other Activities

Pull-Ups

Kettlebell Swings

Kettlebell Basket Squats

Equipment

Super Sonic Speed Rope™

Super 20 TPS Rope™

Kettlebells

WARM-UP: Perform 500 jumps incorporating all skills except Double Unders and Triple Unders. Then, perform 3 minutes shoulder rotation forward and backwards, shrugs, leg and calf stretches.

Intensity ► 2–4 RPS for Double Unders, 3–5 RPS for other jump rope skills

Duration ► Approx. 7 minutes

Frequency ► 2 times per week

ROUND 1

For time:

Pull-Ups - 10

Arm Cross Over with Alternate Foot Step - 100

Kettlebell (Basket Squats) - 20

Double Unders - 50

Kettlebell (Swings) - 30

Arm Cross Over with High Step - 100

Kettlebell (Basket Squats) - 20

Double Unders - 50

Pull-Ups - 10

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Select all weights based on your ability. When jumping be sure to land lightly on the balls of your feet.

BL JUMP ROPE WORKOUT FOR CROSSFITTERS 3

GOAL: To perform jump rope Double Unders with basic jump rope techniques for better transitioning and a high intensity kick-ass CrossFit workout.

FOCUS: Focus on good form. The key to successful Double Unders is in the quick turning of the wrists. Jump only 1.5–3 inches from surface.

Jump Techniques

All skills (except Triple Unders)

Equipment

Super Sonic Speed Rope™

Super 20 TPS Rope™

WARM-UP: Perform 500 jumps incorporating all skills, except Double Unders and Triple Unders. Then, perform 3 minutes shoulder rotation forward and backwards, shrugs, leg and calf stretches.

Intensity ► 2–4 RPS for Double Unders, 3–5 RPS for other jump rope skills

Duration ► Approx. 10 minutes

Frequency ► 2 times per week

ROUND 1

Double Unders - 50

Alternate Foot Step - 50

Double Unders - 40

Alternate Foot Step - 40

Double Unders - 30

Alternate Foot Step - 30

Double Unders - 20

Alternate Foot Step - 20

Double Unders - 10

Alternate Foot Step - 10

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: When jumping be sure to land lightly on the balls of your feet. Exhale before the start of each jump rope bout, relaxing the upper and lower body. Don't forget to breathe throughout. Try this workout going from 10, 20, 30, 40, 50 reps!

BL DOUBLE UNDER WORKOUT FOR CROSSFITTERS

GOAL: To perform jump rope Double Unders with basic jump rope techniques for better transitioning and a high intensity kick-ass CrossFit workout.

FOCUS: Focus on good form. The key to successful Double Unders is in the quick turning of the wrists. Jump only 1.5–3 inches from surface.

Jump Techniques

Basic Bounce
Alternate Foot Step
Double Unders

Equipment

Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 50 reps of the Basic Bounce and 25 reps of the Alternate Foot Step, at 3 RPS, until you've performed 500 jumps total.

Intensity ► 2–4 RPS for Double Unders, 3–5 RPS for other jump rope skills

Duration ► Approx. 10 minutes

Frequency ► 2 time per week

ROUND 1

Repeat this round for 10 minutes

Basic Bounce - 20

Alternate Foot Step - 40 moving forward and backwards

Double Unders - 20

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each Double Unders bout, relaxing the upper and lower body. Don't forget to breathe throughout.

BL POWER DOUBLE UNDER WORKOUT FOR CROSSFITTERS

GOAL: To perform jump rope Double Unders with various vertical acceleration and different landing patterns for an extreme CrossFit workout!

FOCUS: Focus on good form. The key to successful Double Unders is in the quick turning of the wrists. Jump only 1.5–3 inches from surface.

Jump Techniques

Double Unders - 10

Triple Unders - 6

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Exhale before the start of each Double Under and Triple Under bout, relaxing upper and lower body. Don't forget to breathe throughout.

Tabata

8 MINUTE TABATA MASH-UP 1

GOAL: Combine jump rope and various functional exercises, in 20 second bouts, for a high intensity kick-ass workout.

FOCUS: Use your 20 second baseline score for these jump rope exercises.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step
Double Unders

Other Activities

Abs (variations)
Lunges (variations)
Push-Ups (variations)

Equipment

Magic Speed™ Jump Rope
Aero Speed® Jump Rope
Super Sonic Speed Rope™

WARM-UP: Perform 500 jumps of Basic Bounce (500 reps) or Alternate Foot Step (250 reps).

Intensity ► 2–4 RPS for Double Unders, 3.5–5.5 RPS for other jump rope skills

Duration ► 9 minutes

Frequency ► 2 times per week

For each round, perform the exercises for 20 seconds, followed by 10 seconds rest.

ROUND 1

High Step

Abs (Basic Plank)

Lunges (Forward Lunges)

Push-Ups (Classic)

Double Unders

Abs (Bicycle Crunches)

Lunges (Side Lunges)

Push-Ups (Wide Grip)

Rest 1 minute

ROUND 2

High Step

Abs (Up/Down Plank)

Lunges (Jumping Lunges)

Push-Ups (Spiderman)

Double Unders

Abs (Crunches)

Lunges (Rear Lunges)

Push-Ups (Decline)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Prioritize good technique and land lightly on the balls of your feet.

8 MINUTE TABATA MASH-UP 2

GOAL: Combine jump rope and various functional exercises, in 20 second bouts, for a high intensity kick-ass workout.

FOCUS: Use your 20 second baseline score for these jump rope exercises.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step

Other Activities

Push-Ups (variations)

Equipment

Magic Speed™ Jump Rope
Aero Speed® Jump Rope

ROUND 4

Russian Twist

Active Rest: **Basic Bounce**, **Forward Straddle** and **Backwards Jumping** - 140 reps

ROUND 5

Mountain Climbers (Straight and Diagonal)

Active Rest: **Basic Bounce** and **Alternate Foot Step** with **Arm Cross Over** - 140 reps

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Be light on the balls of your feet when jumping.

Multi-Directional Jump Rope Sprint™

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 1

Using All Planes

GOAL: Use your pre-established baseline score at 10 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Push-Ups (Classic)
Mountain Climbers

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 50 reps of the Basic Bounce and 25 reps of the Alternate Foot Step, at 3 RPS, until you've performed 500 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 7 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 10 seconds

Push-Ups (Classic) - 60 seconds

Rest 10 seconds

ROUND 2 + 4

Alternate Foot Step - 10 seconds

Mountain Climbers - 60 seconds

Rest 10 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 2

Using All Planes

GOAL: Use your pre-established baseline score at 15 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Flutter Kicks
Plank

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 50 reps of the Alternate Foot Step, at 3 RPS, until you've performed 600 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 7.5 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 15 seconds

Flutter Kicks - 60 seconds

Rest 15 seconds

ROUND 2 + 4

Alternate Foot Step - 15 seconds

Plank - 60 seconds

Rest 15 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 3

Using All Planes

GOAL: Use your pre-established baseline score at 20 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Forward Lunges
Burpees

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 50 reps of the Alternate Foot Step, at 3 RPS, until you've performed 700 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 8.5 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 20 seconds

Forward Lunges - 60 seconds

Rest 20 seconds

ROUND 2 + 4

Alternate Foot Step - 20 seconds

Burpees - 60 seconds

Rest 20 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 4

Using All Planes

GOAL: Use your pre-established baseline score at 25 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Leg Raises
Curtsey Lunges

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 50 reps of the Alternate Foot Step, at 3 RPS, until you've performed 800 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 9.5 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 25 seconds

Leg Raises - 60 seconds

Rest 25 seconds

ROUND 2 + 4

Alternate Foot Step - 25 seconds

Curtsey Lunges - 60 seconds

Rest 25 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 5

Using All Planes

GOAL: Use your pre-established baseline score at 30 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Russian Twist
Sumo Squats

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 100 reps of the Alternate Foot Step, at 3 RPS, until you've performed 800 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 10 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step- 30 seconds

Russian Twist - 60 seconds

Rest 30 seconds

ROUND 2 + 4

Alternate Foot Step- 30 seconds

Sumo Squats - 60 seconds

Rest 30 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 6

Using All Planes

GOAL: Use your pre-established baseline score at 45 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Bicycle Crunches
Side Lunge

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 100 reps of the Alternate Foot Step, at 3 RPS, until you've performed 900 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 12.5 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 45 seconds

Bicycle Crunches - 60 seconds

Rest 45 seconds

ROUND 2 + 4

Alternate Foot Step - 45 seconds

Side Lunges - 60 seconds

Rest 45 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 7

Using All Planes

GOAL: Use your pre-established baseline score at 60 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques	Other Activities	Equipment
Basic Bounce Alternate Foot Step	Push-Ups (Wide Grip) Squats	Aero Speed® Jump Rope Super Sonic Speed Rope™ Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 100 reps of the Alternate Foot Step, at 3 RPS, until you've performed 1000 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 15 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1 + 3 + 5

Alternate Foot Step - 60 seconds

Push-Ups (Wide Grip) - 60 seconds

Rest 60 seconds

ROUND 2 + 4

Alternate Foot Step - 60 seconds

Squats - 60 seconds

Rest 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 8

Using All Planes

GOAL: Use your pre-established baseline score at 10 seconds, 15 seconds, 20 seconds, 25 seconds and 30 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes, moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 14.5 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1

Repeat 2 times

Alternate Foot Step - 10 seconds

Push-Ups (Decline) - 60 seconds

Rest 20 seconds

ROUND 2

Repeat 2 times

Alternate Foot Step - 15 seconds

Backward Lunges - 60 seconds

Rest 30 seconds

ROUND 3

Repeat 2 times

Alternate Foot Step - 20 seconds

Push-Ups (Decline) - 60 seconds

Rest 40 seconds

ROUND 4

Alternate Foot Step - 25 seconds

Backward Lunges - 60 seconds

Rest 50 seconds

ROUND 5

Alternate Foot Step - 30 seconds

Push-Ups (Decline) - 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

MULTI DIRECTIONAL JUMP ROPE SPRINT™ WORKOUT 10

Using All Planes

GOAL: Use your pre-established baseline score at 10 seconds, 20 seconds, 30 seconds, 45 seconds and 60 seconds (see Sports Training Phase programs). Strive to maintain or exceed your baseline score for each round.

FOCUS: Use all planes—moving with controlled speed in all directions—forward, backwards, laterally and in a circle. Chose only one direction for each round.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step

Other Activities

Push-Ups (Close Grip)
Single Leg Chair Seat Squat

Equipment

Aero Speed® Jump Rope
Super Sonic Speed Rope™
Super 20 TPS Rope™

WARM-UP: Alternate 100 reps of the Basic Bounce and 100 reps of the Alternate Foot Step, at 3.5 RPS, until you've performed 500 jumps total. Follow it up with 5 minutes of active rest at a light pace, such as jog in place.

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 30 minutes

Frequency ► 2–3 times a week until you can pass your baseline score in all sets

In each jump rope set: chose to move forward, backwards, laterally or in a circle. Record score after each set (counting right foot only and then multiplying by two).

ROUND 1

Repeat 3 times

High Step - 60 seconds

Single Leg Chair Seat Squat - 60 seconds

Rest 60 seconds

ROUND 2

Repeat 3 times

High Step - 45 seconds

Push-Ups (Close Grip) - 60 seconds

Rest 45 seconds

ROUND 3

Repeat 3 times

High Step - 30 seconds

Single Leg Chair Seat Squat - 60 seconds

Rest 30 seconds

Rest 20 seconds

ROUND 5

Repeat 2 times

High Step - 10 seconds

Single Leg Chair Seat Squat - 60 seconds

Rest 10 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use proper technique and focus on breathing during intense exercise.

**ANYTIME
ANYWHERE
WORKOUTS**

Beach

BL JUMP ROPE BEACH WORKOUT

GOAL: Integrating 2-minute jump rope bouts with functional exercises to give you the beach body you want.

FOCUS: Perform jump rope techniques with upright body position.

Jump Techniques	Other Activities	Equipment
High Step Backwards Jumping	Jump Squats Sumo Squats Walking Lunges Plank Plank with Leg Lifts Leg Lifts Thrusters Military Presses Push-Ups	Magic Speed™ Jump Rope Aero Speed® Jump Rope Rope Master® Jump Rope Resistance Band Dumbbells Medicine ball

WARM-UP: Jog on beach for 5 minutes. Optionally, add an extra 6 minutes, doing intervals: 10 second sprints, followed by a slow 1-minute jog (total of 5 sprints).

Intensity ► 3 RPS
Duration ► Approx. 21 minutes
Frequency ► 2 times a week

ROUND 1

On moist sand: **High Step** - 2 minutes

Active Rest: 30 seconds slow jog

Push-Ups (Classic) on feet or knees - 10–20

Jump Squats - 20

Plank - 60 seconds

Rest 60 seconds

ROUND 2

On moist sand: **Backwards Jumping** - 2 minutes

Active Rest: 30 seconds slow jog

Thrusters (with dumbbells or medicine ball) - 10–20

Walking Lunges (or Jump Lunges) - 10–20 (each leg)

Leg Lifts - 10–20

Active Rest: 60 seconds

ROUND 3

On moist sand: **High Step** - 2 minutes

Active Rest: 30 seconds slow jog

Military Presses (with resistance band) - 10–20

Sumo Squats - 10–20

Plank with Leg Lifts - 10–20 (each leg)

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Make sure the jump rope portion is performed on level, wet sand.

Office

BL JUMP ROPE OFFICE BODY WEIGHT WORKOUT 1

GOAL: Improve productivity and increase energy levels by doing this jump rope office workout during your lunch break.

FOCUS: Aim to only rest for 60 seconds between rounds.

Jump Techniques	Other Activities	Equipment
Basic Bounce Alternate Foot Step	Air Squats Walking Lunges Scissor Leg Raises Side Planks Supermans Bird Dogs Push-Ups Wall Sit	Magic Speed™ Jump Rope Aero Speed® Jump Rope Rope Master® Jump Rope Resistance Band Dumbbells Medicine Ball

WARM-UP: Perform 500 jumps, alternating between Basic Bounce and Alternate Foot Step.

Intensity ► 3–3.5 RPS
Duration ► Approx. 11 minutes
Frequency ► 2 times a week

ROUND 1

Basic Bounce - 60 seconds

Air Squats - 30 seconds

Scissor Leg Raises (with hands on sit bones) - 30 seconds

Classic Push-Ups (on knees or feet) - 30 seconds

Supermans (feet together) - 30 seconds

Rest 60 seconds

ROUND 2

Alternate Foot Step - 60 seconds

Walking Lunges - 30 seconds

Side Planks - 30 seconds

Classic Push-Ups (on knees or feet) - 30 seconds

Bird Dogs - 30 seconds

Rest 60 seconds

ROUND 3

Alternate between **Basic Bounce** and **Alternate Foot Step** - 60 seconds

Wall Sit - 30 seconds

Scissor Leg Raises (with hands on sit bones) - 30 seconds

Classic Push-Ups (on knees or feet) - 30 seconds

Supermans (feet together) - 30 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Adjust furniture to avoid interference with the path of the jump rope.

BL JUMP ROPE OFFICE BODY WEIGHT WORKOUT 2

GOAL: Improve productivity and increase energy levels by doing this jump rope office workout during your lunch break.

FOCUS: Aim to only rest for 60 seconds between rounds.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Push-Ups (variations)
Dips
Lunges (variations)
Squats (variations)

Equipment

Magic Speed™ Jump Rope
Aero Speed® Jump Rope
Rope Master® Jump Rope

WARM-UP: Perform jumping jacks, bounding, and high knees (without jump rope) for 3–5 minutes.

Intensity ► 3–3.5 RPS

Duration ► Approx. 21 minutes

Frequency ► 2 times a week

ROUND 1

Basic Bounce - 100 reps

Wall Push-Ups - 10–20 reps

Dips (in a chair) - 12 reps

Squats (Double Leg in a chair) - 12 reps

Rest 60 seconds

ROUND 2

Alternate Foot Step - 120 reps

Push-Ups (Desk) - 10–20 reps

Dips (in a chair) - 12 reps

Squats (Air Squats) - 12 reps

Rest 60 seconds

ROUND 3 + 4 + 5

Round 3: Alternate between **Basic Bounce** and **Alternate Foot Step** (10 reps each before switching) - 140 reps

Round 4: Alternate between **Basic Bounce** and **Alternate Foot Step** (20 reps each before switching) - 160 reps

Round 5: **Alternate Foot Step** - 180 reps

Push-Ups (Wide Grip) - 10–20 reps

Dips (in a chair) - 12 reps

Rounds 3 + 4: **Forward Lunges** - 12 reps

Round 5: **Side Lunges** - 12 reps

Rest 60 seconds

ROUND 6

Alternate Foot Step - 200 reps

Push-Ups (Wide Grip) - 10–20 reps

Dips (in a chair) - 12 reps

Rear Lunges - 12 reps

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Adjust furniture to avoid interference with the path of the jump rope.

BL JUMP ROPE OFFICE RESISTANCE BANDS WORKOUT

1

GOAL: Improve productivity and increase energy levels by doing this jump rope office workout during your lunch break.

FOCUS: Aim to only rest for 60 seconds between rounds.

Jump Techniques

Basic Bounce
Alternate Foot Step

Other Activities

Bicycle Sit-Ups
Resistance Bands (variations)

Equipment

Magic Speed™ Jump Rope
Aero Speed® Jump Rope
Rope Master® Jump Rope
Resistance Bands

WARM-UP: Perform jumping jacks, bounding, and high knees (without jump rope) for 3–5 minutes.

Intensity ► 3–3.5 RPS

Duration ► Approx. 19 minutes

Frequency ► 2 times a week

ROUND 1

Basic Bounce - 200 reps
Resistance Band Exercises*

ROUND 2

Alternate Foot Step - 100 reps
Resistance Band Exercises*

ROUND 3

Alternate between **Basic Bounce** and **Alternate Foot Step** (10 reps each before switching) - 200 reps

Resistance Band Exercises*

*Resistance Band Exercises:

Standing Chest Press - 12 reps

Shoulder Press - 12 reps

Standing Bicep Curl - 12 reps

Overhead Triceps Extension - 12 reps

Bicycle Sit-Ups - 60 seconds

Rest 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Adjust furniture to avoid interference with the path of the jump rope.

BL JUMP ROPE OFFICE RESISTANCE BANDS WORKOUT

2

GOAL: Improve productivity and increase energy levels by doing this jump rope office workout during your lunch break.

FOCUS: Aim to only rest for 60 seconds between rounds.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step

Other Activities

Resistance Band (variations)

Equipment

Magic Speed™ Jump Rope
Aero Speed® Jump Rope
Rope Master® Jump Rope
Resistance Bands

WARM-UP: Perform jumping jacks, bounding, and high knees (without jump rope) for 3–5 minutes.

Intensity ► 3–3.5 RPS

Duration ► Approx. 15 minutes

Frequency ► 2 times a week

ROUND 1

Alternate Foot Step - 140 reps

Resistance Band Exercises*

ROUND 2

High Step - 70 reps

Resistance Band Exercises*

ROUND 3

Alternate between **Basic Bounce** and **Alternate Foot Step** (10 reps each before switching) - 140 reps

Resistance Band Exercises*

*Resistance Band Exercises:

Front Squats - 10–12 reps

Front Squats and Press - 10–12 reps

Lateral Band Walks (band around ankles) - 20 reps

Lateral Band Walks (band below knees) - 20 reps

Rest 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Adjust furniture to avoid interference with the path of the jump rope.

Runners

BL RUNNER'S JUMP ROPE SPRINT™ WORKOUT

GOAL: Combine jump rope with running to improve balance, coordination, recovery time and endurance for a faster sprint to the finish line!

FOCUS: Stay light on the balls of the feet and make quick contact with the surface, while staying upright and making minimal wrist movements.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step

Other Activities

Jump Squats
Jump Lunges

Equipment

Aero Speed® Jump Rope

WARM-UP: Perform 500 jumps, alternating between Basic Bounce and Alternate Foot Step.

Intensity ► 3–3.5 RPS

Duration ► Approx. 15 minutes

Frequency ► 2 times a week

ROUND 1 + 3

High Step - 100 reps in place

Sprint 60 meters with the jump rope

Jump Squats - 20 reps

Rest 60 seconds

ROUND 2 + 4

High Step - 100 reps in place

Sprint 100 meters with the jump rope

Jump Lunges - 20 reps (each leg)

Rest 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Use a rubberized surface for sprinting.

Boxing

BL JUMP ROPE BOXING WORKOUT 1

GOAL: Use the jump rope to simulate lightning fast hand movements, foot patterns and anaerobic conditioning required for the winning edge in boxing matches.

FOCUS: Focus on fast turning wrist movement to improve gripping and forearm strength.

Jump Techniques	Other Activities	Equipment
Basic Bounce	Shadow Boxing	Aero Speed® with Green Hornet Cable®
Alternate Foot Step	Jack Knife	Aero Speed® Jump Rope
High Step	Reverse Crunch	Rope Master® Jump Rope
Arm Cross Over	Pull-Ups	MMA gloves
Side Swing to Jump	Bear Crawl	
Double Unders		

WARM-UP: Perform 500 jumps, alternating between Basic Bounce and Alternate Foot Step.

Intensity ► 2–4 RPS for Double Unders, 3.5 RPS for the other jump rope skills
Duration ► Approx. 24 minutes
Frequency ► 2 times a week

ROUND 1

High Step - 50 reps

Shadow Boxing (with MMA gloves) - 150

Bear Crawl - 50 (counting right side)

Arm Cross Over - 50 reps

Jack Knife - 25

Rest 2 minutes

ROUND 2 + 3

Alternate between **High Step** and **Side Swing to Jump** - 50 reps

Shadow Boxing (with MMA gloves) - 150

Bear Crawl - 50 (counting right side)

Double Unders - 50 reps

Round 2: **Pull-Ups** - 5–20

Round 3: **Reverse Crunch** - 20

Rest 2 minutes

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Focus on being light and quick on your feet.

BL JUMP ROPE BOXING WORKOUT 2

GOAL: Use the jump rope to simulate lightning fast hand movements, foot patterns and anaerobic conditioning required for the winning edge in boxing matches.

FOCUS: Focus on fast turning wrist movement to improve gripping and forearm strength.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step with Arm Cross Over
Double Unders (Arm Cross Over)
Side Swing to Jump

Leg Raises - 1 minute

Rest 1 minute

ROUND 5

Alternate between **Forward Shuffle** and **Backward Shuffle** - 3 minutes

Speed Bag - 1 minute

Rest 1 minute

ROUND 6

Alternate between **Backwards Jumping** and **Alternate Foot Step** - 3 minutes

Russian Twist - 1 minute

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Focus on being light and quick on your feet. When alternating between the jump rope techniques, perform them in sequence of 4, 8, 12.

Endurance

BL JUMP ROPE ENDURANCE WORKOUT

GOAL: Use different jump rope techniques to challenge and increase muscular endurance.

FOCUS: Jump in place and in all planes (moving forwards, backwards and laterally and in a circle). Integrate a trampoline, acro board or gymnastics floor for variety.

Jump Techniques	Active Rest	Equipment
Basic Bounce Alternate Foot Step Skier's Jump Bell Jump Side Straddle Forward Straddle X Foot Cross Full Twister Forward Shuffle Backward Shuffle High Step Arm Cross Over Side Swing to Jump	2 minutes walking or jogging	Magic Speed™ Jump Rope Aero Speed® Jump Rope Rope Master® Jump Rope

WARM-UP: Warm up with 2 minutes of bounding without the rope.

Intensity ► 2.5–3 RPS
Duration ► Approx. 36 minutes
Frequency ► 1–2 times per week

ROUND 1 + 2 + 3

10 minutes jumping nonstop (with music)

Jump in all directions and planes, integrating different techniques.

Active Rest: 2 minutes walking or jogging

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Jump nonstop, integrating different techniques with smooth transitions.

BL JUMPATHON

GOAL: Challenge your level of endurance in this jumpathon!

FOCUS: Maintain perfect technique and form for all jump rope skills.

Jump Techniques

All skills

Other Activities

Calisthenics (variations)

Equipment

Rope Master® Jump Rope

WARM-UP: Jog in place for 2 minutes.

Intensity ► 2.5–3.5 RPS

Duration ► Approx. 30–45 minutes

Frequency ► 1–2 times per week

ROUND 1

Calisthenics: **Abs, Push-Ups, Squats, Lunges** - 5–10 minutes

Stretch 5 minutes

Jump 20–30 minutes nonstop, integrating all jump rope skills

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Breathe properly throughout the jump rope session.

Triathlon

BL JUMP ROPE TRIATHLON BRICKING WORKOUT

GOAL: In this bike/run brick workout, we substitute jump rope for the running portion. Great during inclement weather and when exercising outside could be unsafe.

FOCUS: Jump in place and in all planes (moving forwards, backwards and laterally), while staying in the same heart rate zones as when you run.

Jump Techniques

Basic Bounce
Alternate Foot Step
High Step

Other Activities

Stationary bike or outdoor bike

Equipment

Magic Speed™ Jump Rope
Rope Master® Jump Rope
Aero Speed® Jump Rope
Bike

WARM-UP: Warm up with 2 minutes of bounding without the rope.

Intensity ► 3 RPS

Duration ► 72 minutes (including 60 minutes biking)

Frequency ► 1–2 times per week

ROUND 1

60 minutes biking (stationary or outdoor bike)

ROUND 2

Alternate between **Basic Bounce** and **Alternate Foot Step** (staying stationary) - 3 minutes

High Step (travel forward and backwards) - 1 minute

ROUND 3

Alternate between **Basic Bounce** and **Alternate Foot Step** (staying stationary) - 3 minutes

High Step (travel forward) - 1 minute

ROUND 4

Alternate between **Basic Bounce** and **Alternate Foot Step** (staying stationary) - 3 minutes

High Step (travel forward, backwards and laterally) - 1 minute

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Jump nonstop integrating the different techniques with smooth transitions.

Heavy Rope/ Speed Rope

BL JUMP ROPE HEAVY AND SPEED ROPE WORKOUT 1

GOAL: Combine heavy rope and speed rope training to improve power, strength, speed and agility all in one session!

FOCUS: Use a heavy rope that is under one pound and can be turned safely. Maintain high intensity with all rope materials.

Jump Techniques	Equipment
Basic Bounce	Heavy Rope (1 lb)
Alternate Foot Step	Speed Rope with PVC (Aero Speed®)
High Step	Super Speed Rope (Aero Speed® with Green Hornet Cable®, Super Sonic Speed Rope™, Super 20 TPS Rope™)

WARM-UP: Perform 500 Basic Bounce (500 reps) or Alternate Foot Step (250 reps).

Intensity ► 3–4 RPS
Duration ► Approx. 15.5 minutes
Frequency ► 2 times a week

ROUND 1

Heavy Rope: **Basic Bounce** - 140

Rest 1 minute

Speed Rope: **Alternate Foot Step** (use baseline score) - 60 seconds

Rest 1 minute

Super Speed Rope: **High Step** (use baseline score) - 60 seconds

Rest 1 minute

ROUND 2

Heavy Rope: **Basic Bounce** and **Alternate Foot Step** backwards - 180

Rest 1 minute

Speed Rope: **Alternate Foot Step** (use baseline score) - 45 seconds

Rest 45 seconds

Super Speed Rope: **High Step** (use baseline score) - 45 seconds

Rest 45 seconds

ROUND 3

Heavy Rope: **Basic Bounce, Alternate Foot Step** and **High Step** - 220

Rest 1 minute

Speed Rope: **Alternate Foot Step** (use baseline score) - 30 seconds

Rest 30 seconds

Super Speed Rope: **High Step** (use baseline score) - 30 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Maintain tight core, upright posture and firm grip during heavy rope training portion.

BL JUMP ROPE HEAVY AND SPEED ROPE WORKOUT 2

GOAL: Combine heavy rope and speed rope training to improve power, strength, speed and agility—all in one session!

Bulgarian Bag (Power Snatch) - 10 reps

Rest 30 seconds

Bulgarian Bag (Power Snatch) - 10 reps

Rest 30 seconds

Alternate between **Double Unders**, **Side Straddle**, **Skier's Jump** and **Bell Jump** - 60 seconds

Rest 60 seconds

Alternate between **Double Unders**, **X Foot Cross** and **Arm Cross Over** - 60 seconds

Rest 60 seconds

ROUND 3

Bulgarian Bag (Arm Throw) (move bag over alternate shoulder) - 10 reps

Rest 30 seconds

Bulgarian Bag (Arm Throw) (move bag over alternate shoulder) - 10 reps

Rest 30 seconds

Alternate between **Alternate Foot Step**, **High Step** and **Side Swing to Jump** - 60 seconds

Rest 60 seconds

Alternate between **Alternate Foot Step**, **Forward Shuffle** and **Backwards Shuffle** - 60 seconds

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Focus on keeping your core tight.

Stability Ball

ADVANCED 30 SECONDS CIRCUIT JUMP ROPE WORKOUT WITH STABILITY BALL

GOAL: Combine jump rope with stability ball exercises for a powerful workout to improve core stability, posture, and muscle balance.

FOCUS: During jumping, keep body upright and keep core tight.

Jump Techniques

All skills (except Triple Unders)

Other Exercises

Physioball (variations)

Equipment

Rope Master® Jump Rope
Stability Ball

WARM-UP: 500 jumps incorporating all jump rope skills (except the Double Unders and Triple Unders).

Intensity ► 2–4 RPS for Double Unders, 3–4 RPS for other jump rope skills

Duration ► Approx. 15 minutes

Frequency ► 2 times per week

ROUND 1 + 2 + 3

Perform for 30 seconds at each station.

Double Unders

Physioball: Upper Body (Ball Balance Push-Up, Ball Pike, Ball Roll Out)

Physioball: Core (V-Sit with Ball, Knee Tucks with Ball, Side Squat with Ball)

High Step with Arm Cross Over

Physioball: Legs (Overhead Ball Squat, Ball Hamstring Curl, Ball Reverse Extensions)

Double Unders (Arm Cross Over)

Active Rest: 2 minutes jogging to lower heart rate

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Make sure the stability ball is properly inflated for the best workout.

Speed Ladder

ADVANCED 15 SECONDS CIRCUIT JUMP ROPE WORKOUT WITH SPEED LADDER

GOAL: Combine jump rope and speed ladder drills to boost agility, quickness, foot speed, coordination, and body awareness. You will also improve vertical and horizontal jumping performance.

FOCUS: Try to maintain or exceed your baseline score for these jump rope bouts.

Jump Techniques

All skills (except the Double Unders and Triple Unders)

Other Exercises

Speed Ladder
Drills

Equipment

Rope Master® Jump
Rope
Speed Ladder

WARM-UP: Perform 500 jumps incorporating all jump rope skills (except the Double Unders and Triple Unders).

Intensity ► 3.5–5.5 RPS

Duration ► Approx. 11.5 minutes

Frequency ► 2 times per week

ROUND 1:

Repeat 3 times

Perform for 15 seconds at each station.

High Step

Speed Ladder (Hop Scotch Drill)

Speed Ladder (In-Out Drill)

Alternate Foot Step

Speed Ladder (Tango Drill)

High Step

Speed Ladder (5 Count Drill)

Active Rest: 2 minutes jogging to lower heart rate

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: When beginning a speed ladder training program, start slowly to master the pattern of movement. Do your best to avoid catching your foot on the ladder.

Battling Rope

ADVANCED 60 SECONDS CIRCUIT JUMP ROPE WORKOUT WITH BATTLING ROPE

Basic Moves

GOAL: Combining jump rope with battling ropes provides a dual-force dynamic effect to improve physiological response while strengthening weak body parts.

FOCUS: For the jump rope portion, keep your body upright and keep your core tight.

Jump Techniques

All skills (except Double Unders and Triple Unders)

Other Exercises

Battling Rope
(variations)

Equipment

Rope Master® Jump
Rope
Battling Ropes

WARM-UP: Perform 500 jumps incorporating all skills (except Double Unders and Triple Unders).

Intensity ► 3–3.5 RPS

Duration ► Approx. 16 minutes

Frequency ► 2 times per week

ROUND 1 + 2

Perform for 60 seconds at each station.

Skier's Jump to Bell Jump

Battling Rope (Double Wave)

Battling Rope (Alternating Wave)

Side Straddle to Forward Straddle

Battling Rope (Low Alternating Wave)

Backwards Jumping

Battling Rope (Snakes on the Floor)

Active Rest: 2 minutes jogging to lower heart rate.

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: The most common length for battling ropes is 50 feet. Keep in mind you'll need 25 feet of clear space.

Battling Ropes

WARM-UP: Perform 500 jumps incorporating all skills (except Double Unders and Triple Unders).

ROUND 1 + 2

Perform for 60 seconds at each station.

Basic Bounce

Battling Rope (Alternating Wave Lunge Jump)

Battling Rope (Power Slam)

Alternate Foot Step

Battling Rope (Alternate-Arm Power Slam)

Basic Bounce

Battling Rope (Alternating Wave Reverse Lunge)

Active Rest: 2 minutes jogging to lower heart rate.

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: The most common length for battling ropes is 50 feet. Keep in mind you'll need 25 feet of clear space.

Bosu Ball

BL JUMP ROPE AND BOSU BALL WORKOUT

GOAL: Combine jump rope with the Bosu Ball for versatility and balance training.

FOCUS: Maintain perfect technique and form for all jump rope skills.

Jump Techniques

All skills (except Triple Unders)

Other Activities

Bosu Ball (variations)

Equipment

Rope Master® Jump Rope
Bosu Ball

WARM-UP: Perform 500 jumps incorporating all jump rope skills (except Double Unders and Triple Unders).

Intensity ► 2–3 RPS

Duration ► Approx. 24 minutes

Frequency ► 2 times per week

ROUND 1 + 2 + 3

Bosu Ball: Push-Ups (ball side down) - 12–15 reps

Bosu Ball: Squats (ball side up) - 12–15 reps

High Step - 2 minutes

Bosu Ball: Sit-Ups (ball side up) - 12–15 reps

Bosu Ball: Lunges (ball side up) - 12–15 reps

ROUND 1:

Bosu Ball: Basic Bounce (ball side up) - 1 minute

Rest 60 seconds

ROUND 2:

Bosu Ball: Double Unders (ball side up) - 1 minute

Rest 60 seconds

ROUND 3:

Bosu Ball: Forward Straddle (ball side up) - 1 minute

Cool Down: End jump rope session with hydration, stretching and visualization.

Tip: Take care when jumping on the Bosu Ball and be sure to master all jump rope skills on the floor first.

ACKNOWLEDGEMENTS

I wish to express my deepest gratitude to:

Greg Glassman (Founder of CrossFit), Randy Hetrick (Founder of TRX), Shannon “The Cannon” Hudson (Founder of 9Round Fitness), Ivan Ivanov (Inventor of the Bulgarian Bag), David Weck (Inventor of Bosu Ball) and John Brookfield (Inventor of Battling Ropes) for supporting me in my mission on educating, motivating and inspiring the world towards proper jump rope training to become fit, strong and healthy.

James Villepigue, my brand manager and agent, best-selling author and good friend, who introduced me to Hatherleigh Press (in partnership with Penguin Random House) and helped solidify my partnership with CrossFit while making important contributions to ensure this book became a reality.

Chris Rawlins, my CrossFit Jump Rope Program Manager and good friend who consulted with me on this book and, along with his lovely wife Renae, encouraged me to return to the CrossFit community, where he is now helping to spread my methodology worldwide.

Paul Feciura, my business partner, President of USA Jump Rope and good friend, who alongside me developed the patented swivel bearing technology that has revolutionized the way jump ropes function today.

Josh Henson, an acclaimed Sports and Entertainment attorney and friend in wrestling, who helped me to introduce jump rope into AAU (Amateur Athletic Union) in 1995, and went on to help establish FISAC (Fédération Internationale de Saut à la Corde) and USAJRF (USA Jump Rope Federation), which are responsible for having laid the groundwork for jump rope to one day become an official Olympic sport.

Herbert Rainey, Jr., a Master in karate, my childhood mentor and friend, who put the first jump rope in my hands at age 15 and told me: “Grasshopper, the key to jumping is to be light on the balls of your feet. If you hear your feet hitting the surface, you are jumping too hard.”

Team Hatherleigh Press and Penguin Random House, a big thank you for helping me share this vital health and fitness-based information with the world.

In conclusion: a sincere thank you to my entire family, friends, Jump Rope ambassadors, fitness enthusiasts and athletes of all sports who love to jump rope for fitness, sports cross training and competition, while inspiring others around the world to Get Fit...Be Strong...and Rope to Success®!

ABOUT BUDDY LEE

Anthony “Buddy” Lee is a U.S. Olympian, founder of Jump Rope Technology and the Jump Rope Institute, author of *Jump Rope Training* and creator of the first certified online jump rope course. He is recognized as the world’s leading authority on jump rope training for improved fitness and championship sports performance and is the inventor of the swivel bearing technology that has revolutionized the way jump ropes function today.

Buddy has put on 6,000 presentations worldwide before celebrities and national leaders, inspiring millions to jump into fitness. He has been inducted into several Halls of Fame, including National Wrestling, African American, Old Dominion University and Highland Springs High School.

After graduating from Old Dominion University, Buddy went on to serve 11 years in the United States Marine Corps, and became a 10-time All Marine Wrestling Champion and voted twice Best US Marine Athlete of the Year. He credits jump rope as the key to his success in developing into one of the quickest, most explosive and most highly conditioned wrestlers

in the world, winning six World Military, 8 U.S. Open and 13 Armed Forces National Championships.

In 1996, Buddy was appointed the U.S. Olympic Team's Conditioning Coach, in addition to Olympic Torch Bearer, Ambassador of Fitness for Boys and Girls Clubs of America, and the U.S. Drug Enforcement Administration. His brand also became the Olympic team's official jump rope.

In 2007, Greg Glassman, creator of CrossFit, personally asked Buddy to teach his jump rope training methodology to CrossFit. And, in 2018, he officially endorsed Buddy Lee as the CrossFit Jump Rope Subject Matter Expert for their current 4 million members and 15,000 boxes worldwide.

In 2009, he partnered with Randy Hetrick, Navy Seal and creator of the TRX Suspension Trainer, to combine jump rope with TRX in a system offered in homes and gyms worldwide. In 2012, Buddy was appointed spokesperson for the United States Army Get Fit and Be Strong Program for military families around the world, in collaboration with First Lady Michelle Obama's Let's Move Initiative. In 2018, 9Round Fitness co-branded the Buddy Lee Rope Master Jump Rope as their official rope to be used in all of their gyms worldwide.

Buddy Lee's Jump Rope Technology and System has helped catapult the jump rope phenomenon you see around the world today. His original Swivel Bearing Rope System and educational programs can be found on Amazon, eBay, Walmart, TRX, 9Round Fitness, UFC Gyms, Rogue Fitness, buddyleejumpropes.com and on many other platforms.

Rope to Success® with Buddy Lee!

ABOUT GREG GLASSMAN

Coach **Greg Glassman** is the creator of CrossFit, a diet and exercise lifestyle prescription, cultural phenomenon, and small business movement. The extraordinary effectiveness of CrossFit's prescription—constantly varied, high intensity, functional movement—practiced in a supportive community environment has made CrossFit, Inc. a leading player in global health.

After decades of coaching and clinical program development, Glassman started CrossFit.com in 2001 to share the “Workout of the Day” and began affiliating gyms using his methods under the CrossFit name in 2003. Currently, more than 14,000 independently-owned CrossFit gyms and over 200,000 CrossFit credentialed trainers operate in more than 150 countries. CrossFit has been recognized by the Harvard Business School as the fastest growing chain ever. Glassman's continuing passion is the promotion and protection of his gyms' finest work: the prevention and reversal of chronic disease.
